Getting blisters on our feet since 1961

Federal, provincial governments receive poor grades for protecting wildlife

by Craig Saunders
B.C. Bureau

VICTORIA (CUP) --Canada's efforts to protect endangered species are a dismal failure, according to a report card released last week by the Endangered Species Coalition.

The federal government and the governments of British Columbia, Newfoundland, Nova Scotia, PEI and the territories all received a failing grade from the Ottawa-based coalition. Manitoba scored highest with a C.

The mark is not an evaluation of a government's overall performance with respect to protecting endangered species, but is rather a reflection of whether there is adequate legislation in place to fulfill the National Accord For the Protection of Species at Risk. The accord was signed by the federal, provincial, and territorial wildlife ministers last October. It commits the governments to developing legislation that enable it to meet 14 specific criteria for effectively protecting endangered species.

"A passing grade means there is legislation in place that fulfills the national accord," Catherine Austen of the Canadian Nature Federation in Ottawa, said.

According to Austen, Manitoba, Ontario, Quebec and New Brunswick all have some such legislation in place. Unfortunately, she said, that legislation is lacking in key areas. These provinces' marks ranged from C- to C. PEI and Nova Scotia both have legislation in the works which would raise their marks from a failing grade into the C range. If Nova Scotia implements required habitat protection, as the coalition hopes it will, its mark could exceed the national high of Manitoba. But the coalition's report was likened in a negative light to the Maclean's magazine ranking of Canadian universities by Nova Scotia wildlife department spokesperson Mark Elderkin.

We looked at the material the coalition used and it was our opinion there were additional factors which were not included," he said.

Elderkin says the coalition's cri-

teria were accurate, but it was not considered within the context of other legislation. He did not say when Nova Scotia's new legislation might be ready, nor if it will include the habitat protection measures requested by the coalition.

Canada's failing grade is particularly embarrassing, Austen says, because Montreal recently became home to the United Nations Biodiversity Secretariat. "It reflects poorly," she said. "Very poorly."

Despite Alberta's narrow pass of D-, it deserves criticism along with the failing British Columbia, according to the coalition's report, because neither province seems willing to implement legislation to improve its score. Kate Smallwood, of the coalition's B.C. chapter, is upset the province's government will not do more to protect endangered species. British Columbia does not have legislation covering any of the 14 categories on the report card. "B.C. has more living things than anywhere else in Canada, and is doing the least to protect them," said Smallwood, noting that over 70 per cent of all bird and mammal species in Canada reside in the province. "B.C.'s performance is appalling and indefensible."

Although the province enacted a Wildlife Act, it only identifies four species and one area as endangered. A provincial code regulating forestry practices contains measures to protect endangered species, but those measures have not been implemented, said Smallwood.

"What's happened with the slashings [to the provincial budget] is that there are less fish and wildlife people," said Smallwood. "The B.C. government has a commitment to British Columbians and Canadians in general to protect endangered species, and they're not doing it."

But Nancy Bircher, director of B.C.'s Wildlife Branch, defends the work her government and others are doing to protect wildlife in Canada.

From what I've observed, I'm quite proud of how the 10 provinces have worked together on endangered species," she said. "We're working hard on this, it's a priority for our ministry." She adds that in addition to the Forest Practices Code, protective measures for endangered species exist under the new provincial Fish Protection Act.

In Newfoundland, environmentalists echo the concerns of their B.C. counterparts. There is, however, more optimism for future action.

I'm hoping [the report card] is going to give a wakeup call to our government," said Jessica Webb of the Protected Areas Association in Newfoundland. "The government has committed to a system of protected areas by the year 2000... but only 1.9 per cent is protected."

Last Friday, the Newfoundland government announced the creation of the Burnt Island Ecological Reserve. While the association views this as a positive development, they remain critical of the government's overall commitment. They are also calling for the creation of the Little Grand Lake Ecological Reserve to protect 250 of Newfoundland's 300 endangered pine marten.

The Newfoundland government, however, is critical of the report for only considering legislation in place. Newfoundland ranks as one of the top provinces in terms of person-years dedicated to endangered species," said Anna Buffinga, a provincial spokesperson. The province is currently developing legislation, but the process is in its early stages, she says.

The Endangered Species Coalition is an umbrella group with the support of more than 100 environmental, labor, business, religious, farming and legal groups.

their boat," said Michael Turner, deputy commissioner of the Coast Guard.

The Irving Corporation has filed a statement of defence in federal court. In a public statement they claimed the government took an unnecessary risk in raising the barge, and should have left it where it was.

The majority of expenditures and costs incurred by the Crown were excessive, unwarranted and resulted from errors and bad judgement on the part of government officials," the company said in a statement issued last week.

"That isn't relevant," the organizer of the weekend's protests, Aaron Koleszar, said. "They made the mess and it was their responsibility to clean it up... the government could have handled things better, but something needed to be done."

They make a mess and like a little child they're refusing to

clean it up," Shannon Lynch, a protester picketing at an Irving gas station in Halifax, said. "It's just an example of how little they care about people or the environment."

Protests also took place last weekend in Sydney, Nova Scotia, Charlottetown, P.E.I., and other cities, where turnouts ranged from nine to 18 people.

Koleszar says this month protests against Irving will spread across the Atlantic provinces, with protests planned in Newfoundland and New Brunswick.

The government says it will take a few weeks to examine the Irving statement of defence, and then both parties will move into a discovery phase, where relevant documents will be examined by both sides.

"At some point in the future it will go to court but we are going to be very clear that we are prepared to talk to them at any time and work towards an out-of-court settlement," Turner said.

Smaller Ontario schools lose out in funding scramble

by Alida Akey
The Varsity

TORONTO (CUP) A striking disparity has emerged from the Ontario government's push to have individual institutions raise their own money for student aid.

In the spring of 1996, the provincial government introduced the Ontario Student Opportunity Trust Fund, a one-year fundraising initiative to encourage individuals and corporations to donate money earmarked for student aid to individual colleges and universities. The government promised to match the private donations.

Now the final numbers are in, and critics of the program are concerned about the huge disparity between the amounts that different post-secondary institutions were able to raise.

The big winner was the country's largest university, the University of Toronto. It raised \$86-million in donations. With the matching funds from the province and the money that U of T itself is adding to the pot -- it is the only Ontario university also matching private donations dollar for dollar -- the school now has an endowment fund of \$250-million for student aid.

But Ryerson Polytechnic University, just a few blocks away from U of T, secured less than \$3 million in donations, giving it an endowment fund of only \$6 million.

We were certainly at a disadvantage," Bruce Hurley, senior development officer at Ryerson University, said, pointing to the lack of fundraising infrastructure and Ryerson's short six year history as an accredited university.

But Adel Sedra, U of T's vice-president and provost, says news of less successful fundraising drives should not detract from his university's sense of a job well done. Ryerson's situation is highly regrettable. At the same time, I am not embarrassed about the amount of money we raised for our students. The cause is a very good one."

Many other smaller universities in Ontario were able to obtain a mere fraction of what U of T did in donations. Lakehead University raised just over \$3 million and Nipissing University attracted just over \$1.5 million.

And although Laurentian University raised a significant amount in relation to its student base -- the \$6 million raised ranks fifth in the province on a per capita basis -- university

spokesperson Janet Sailian say she has problems with the trust fund initiative.

We would never have been able to do what U of T did," she said, alluding to the triple match. "It's sort of a self-fulfilling prophesy. If you're [older] and wealthier you can triple your wealth."

It was great to get free money from the government, but it's the inequities that are a problem."

Wayne Poirier, chair of the Ontario component of the Canadian Federation of Students, agrees. He says these types of initiatives spell disaster because they breed inequality.

It's really a nasty cycle that northern schools are subjected to," he said, pointing out that institutions that did poorly now have less incentives to offer students and may be forced to cut programs as a result of a drop in enrollment.

But Brian Wolfe, a spokesperson for the Ministry of Education, says the trust fund initiative will help all schools in the province become effective fundraisers. "By creating [the fund], it's created an impetus for other institutions to get involved in fundraising for student aid."

Ontario's colleges, however, face a handicap in the race to raise private dollars, with little in the way of fundraising infrastructures.

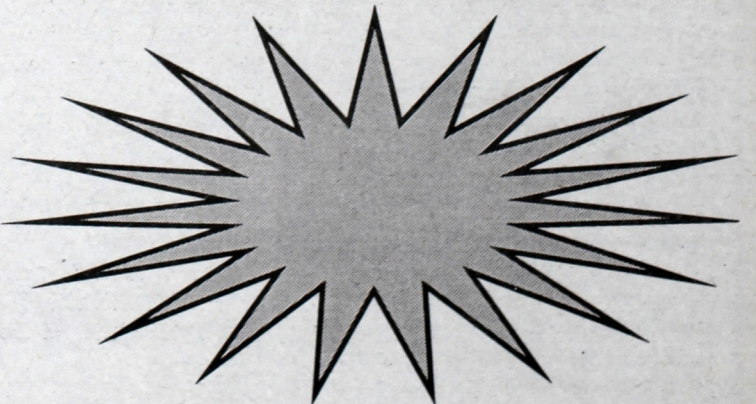

Ontario colleges have not [previously] had the right to raise funds from private donors," Leigh Hobson, director of development at the Seneca College Foundation, said. "In fact, we were actively discouraged from raising money to support college initiatives."

Seneca was only able to raise \$190,000 for the trust fund. Other colleges fared even worse. George Brown College raised a mere \$72,000, while Centennial College received \$141,800.

Because of these poor performances, the government has extended its offer to match gifts for one more year for colleges.

Poirier says, however, that with the trust fund program, the provincial government is shirking its funding responsibilities.

It's a drive for competition and really gets the province out of funding student aid," he said. "The government's goal is to make institutions into fundraisers and make university administrators into fundraisers."

Mesoporous Material Marvels and Mercier

by Phillip Hadley
Staff Writer

The most recent acquisition by our Laurentian University Chemistry department has been Dr. Louis Mercier, who joined the ranks this past August. Dr. Mercier earned his doctorate from the University of Ottawa, and is currently a professor of organic chemistry. Dr. Mercier's research for the past two years has dealt with mesoporous molecular sieves.

Dr. Mercier's past two years of post-doctoral research have taken place at Michigan State University under the guidance of Dr. T.J. Pinnavaia. Dr. Pinnavaia is widely regarded as the leading researcher in the world concerning mesoporous materials. Since working at MSU, Dr. Mercier himself has gained a reputation as well for being a world class leader in the field of adsorbent materials.

Functionalized mesoporous molecular sieves are adsorbent materials. To grudgingly use a crude example, they are like sponges, though they can be used for other applications as well, such as catalysts or catalyst supports. Mesoporous materials are special from other ad-

sorbent materials, like amorphous silica gel, because they have a high surface area (700-1200 m²/g) and uniform pore structures (diameters in the range of 20-100 angstrom).

Molecular sieves, such as zeolites, have been around since the 1950's. Mesoporous molecular sieves were invented in 1992. The innovation on which Dr. Mercier is building his reputation, in the chemistry world, is that he has taken the mesoporous molecular sieves, added to that a chemical functionality (thiol groups) which line the inside of the pore and BOOM: you have a much improved adsorbent material (3-mercaptopropyltrimethoxysilane MP-HMS), ten times better than the leading adsorbent materials.

The applications for such a material are vast. However, Dr. Mercier is particularly concerned with environmental reclamation efforts. Hence, the first adsorbent material he invented soaked up heavy metal ions such as mercury, lead and cadmium. Lab scale tests for the purification of mercury contaminated water has proved most successful and impressive.

MP-HMS can do what every other adsorbent can do, but it can do it ten times better. This is of particular interest to large multinational, multi-polluting companies such as Ford, Mobil (where mesoporous sieves were invented in 1992), and other petro-chemical companies. Given that mercury hasn't been in the headlines recently, here is an interesting statistic: up to 10 000 tons of mercury are dumped into the environment each year. MP-HMS can go a long way in helping to clean up this vast waste. Indeed, here in Sudbury, Dr. Mercier's innovation can go a long way in helping the environmental reclamation efforts to restore the past beauty of our landscape.

As a proven successful researcher and innovator in the field of chemistry, Dr. Mercier is a grand addition to our Laurentian community. His work with mesoporous materials and other functionality groups will continue to grow at Laurentian. We are fortunate to have gained his expertise and innovative spirit by which both ourselves and our environment will benefit.

Protesters call for legalization of pot at Montreal smoke-in

by Stephanie Carriere
The Link

MONTREAL (CUP) -- "All we are saying is give weed a chance" was the theme of a recent demonstration in Montreal supporting the legalization of marijuana.

The smoke-in at Berri Park, held Sept. 27, was organized by Bloc Pot, a grassroots political party whose only platform plank is the decriminalization of marijuana. Supporters of the party say legalizing

pot will allow the government and law enforcement officials to focus on more pressing issues.

"If you legalize pot, the cops can spend their time on more important things," a student at the smoke-in who was visiting from Amsterdam, said. He pointed to the numerous police officers patrolling the blocks surrounding the park.

"They should have better things to do," he said.

But Bloc Pot party leader Marc

St. Maurice says he's not surprised by the significant police presence. "When we had the demonstration last year, there were more cops than this," he said, adding that several demonstrators were arrested at last year's protest.

People started gathering for the smoke-in several hours before it was scheduled to begin, playing guitars and bongos and singing. Flags displaying marijuana leaves and slogans like "La legalization du cannabis" were everywhere.

The Contest

To celebrate Women's History Month, Lambda is having a little contest. Entrants are asked to take the Quiz below and submit the completed entry form to Lambda. You have eight days from publication to submit your entry, so don't be too hasty. It may be worth your while to invest a half-hour of your time and surf the net, or browse the library's on-line catalogue for clues. Or, you could go to the Women's History Month celebration on Wednesday, October 22, where you are likely to find all the answers to these questions (and probably others too!).

Name:
Telephone or e-mail:
Student Number:

1. What Canadian "first" did Helen Battle achieve?
 - A) The first woman to graduate with a degree in geology.
 - B) The first woman ornithologist to do extensive field work.
 - C) The first woman member of the Canadian Aeronautical and Space Institute.
 - D) The first woman to obtain a Ph.D. in marine zoology.

The Rules

The contest is open to SGA members only. Only one entry (the first received) will be accepted for the contest. Prizes will be awarded based on the number of correct answers, using a draw in the event of a tie. The deadline for entries is 12:00 p.m. on Friday, October 24. Submit entries at the Lambda office, Room SCE 301 above the Student Center (you may slide the entry under the door, but we are not responsible for lost entries!). Please ensure your answers are clearly indicated, and your name and phone number are legibly

2. Acadian Marie-Henriette Lejeune Ross was admired for work in which of the two following professions?

- A) Midwifery
- B) Botany
- C) Naturopathy
- D) Healer

3. In 1994, there were 876 undergraduate diplomas and certificates awarded in engineering and applied science. What percentage of these were women?

- A) 9%
- B) 18%
- C) 26%
- D) 34%

written! Winners will be determined at the Lambda office at 1:00 p.m. on Friday the 24th.

The Prizes

We have two great "homegrown" books to give away. We have *Changing Lives: Women in Northern Ontario*, which is a collection of essays edited by Margaret Kechnie and Marge Reitsma-Street. Many of the articles are written by past and present LU professors. Among them is Linda Ambrose whose *For Home and Country: The Centennial History of the Women's Institutes in Ontario* is our second first prize.

4. Who was the first woman geologist in the Canadian government and the first woman elected to the Royal Society of Canada?

- A) Roberta Bondar
- B) Olivia Poole
- C) Nellie McClung
- D) Alice Wilson

5. What did Canadian Ruth Addams invent in the 1850s?

- A) railway car "carheater"
- B) dishwasher
- C) cook stove
- D) washing machine

LU NEWS BRIEFS

by Sarah Viau
Asst. News Editor

LU graduate receives \$52,000 scholarship

After receiving his Master of Science degree from Laurentian University, Scott Brooks has been awarded the first Federal Biosystematics Group Fellowship by the Canadian Museum of Nature. He will be collecting \$17,400 over the next three years to support his graduate work in biosystematics at McGill University.

This major science fellowship was established in 1995 to support Ph.D. research in biosystematics, and Scott Brooks is the first recipient. Scott is aiming his research towards better understanding Long-legged flies, a common but poorly known family of northern insects.

Secrets of Sudbury's Streets

The official launch of the book *Street Names of Downtown Sudbury / Noms de rue du centre-ville de Sudbury* was held on Thursday, October 9. The authors, Lionel Bonin, Director of Laurentian University's J.N. Desmarais Library, and Gwenda Hallsworth, local historian, present - in a bilingual format - a valuable addition to the documentation of Sudbury's municipal history.

Dr. Laurence Steven, publisher and professor of English at Laurentian University, explains that "street names are a testimony to the people and events that shape our lives, locally, provincially, nationally, and internationally".

Street Names of Downtown Sudbury / Noms de rue du centre-ville de Sudbury can be purchased for \$20 by calling Your Scrivener Press at 522-5126.

LU Community in Solidarity with Teachers

On Wednesday, October 8, a press conference was held, during which time the Laurentian University Coalition for Social Justice, the Students' General Association, l'Association des étudiants et étudiantes francophones, and the Laurentian University Faculty Association were given the opportunity to show their support for the teachers in their struggle to maintain a quality education system.

If the proposed cuts take place, under Bill 160, they will inevitably mean more students in crowded classrooms, as well as substantially fewer teachers. The coalition partners present at the press conference asserted that they are completely behind the teachers, and are even prepared to stand side by side with them on the picket line, if that becomes necessary.

Laurentian Professor returns from Silicon Valley

Dr. Craig Summers, professor of Psychology at LU, spent most of the summer in Silicon Valley, located south of San Francisco. Dr. Summers is an expert in virtual-reality technology, and has developed the expertise to produce three-dimensional photo-realistic scenes and virtual tours for education and business.

Using e-mail and Web technology, Dr. Summers was able to communicate and work with lab personnel in Sudbury and Toronto, and they produced a virtual-reality presentation, creating three-dimensional and photo-realistic scenes of the Global Knowledge 97 Conference, held in July in Toronto.

LU to celebrate Women's History Month

by Norman Shields
News Editor

Laurentian University will be celebrating Women's History Month (WHM) on Wednesday, October 22 in room L239 (between the Student Center and the Student Awards office). Established in 1992 by Status of Women Canada, WHM's goal is "to write women back into Canadian history and to develop a better understanding of the diverse roles women play in contemporary society." This year's theme is "discovering women in science and technology".

Sponsored by the Women Studies Department, the Office of the Vice President Academic, the Women's Centre and the History Society, Wednesday's celebration will feature a morning and afternoon film, and a panel discussion chaired by Helen Joly, Ann Galli and Anne Matte.

Although long excluded from the science professions, women have, nevertheless, made significant contributions to science and technology throughout Canada's history. Some notable Canadian women from the sciences: Harriet Brooks, born in

1876, was Canada's first female nuclear physicist; Maude Abbott, born in 1869, became an international authority on congenital heart ailments; Irma LeVasseur broke the gender barrier at the Quebec College of Physicians and Surgeons in 1903; Elsie Gregory MacGill, born in 1927, was Canada's first woman to graduate with a B.Sc. in electrical engineering and is remembered for the production of the Hawker Hurricane, a plane made famous in World War II's Battle of Britain; Rachel Zimmerman, at the age of 13, developed a printer for Blissymbols (an international pictograph language for use on computers); Dorothy Jones, in 1994-1995, was the first black woman to be National President for the Canadian Operational Research Society; this year, Nadine Caron became the first aboriginal woman to graduate from UBC's medical school (she was also the top student in her graduating class) and Julie Payette, the only woman astronaut on the "Canadian Team", continues to conduct research in human-computer interfaces.

I have to be completely honest going running for over a month now with you, I'm a bit pissed off with the and we still have not heard from way things are going so far this year. many of you, so start now!

You see, when I first took this job, I was Are we doing a good job or not? we excited to be able to be the messenger for really don't know since we haven't the students of Laurentian. I mean people heard from many of you yet. So I am would send me letters complaining hoping that this letter may make a about things that our paper has done few eyes open and some of you will poorly or something that was a bit inappropriate for that issue or just a letter to wake up and either send a complaint bitch about the school in general. As effort in our passed issue, it's up to you "The students."

realize that something is missing; "Let- The university bookstore, library, great hall, whatever facility it ters."

It really pisses me off when I hear everyone complaining about the library, bookstore, great hall, or even professors (But nobody ever has problems with them do they) and they have not sent me any letters. "What's the matter with you people, get involved." Most of you are probably aware of those people who are constantly complaining about things. Wouldn't it be nice if you practiced your rights as a student and voiced those complaints by putting them on paper? Well, now is your chance. I not only want constant letters of people complaining but also anything you wish to add about our work so far. The Lambda has been what do you think?

Jobs, Jobs, Jobs...

There are a number of full-time and part-time positions available through the Placement Centre.

Doane Raymond, KPMG, and Ernst & Young are looking for staff accountants and Inco, Cominco, Placer Dome and Falconbridge have positions available in Chemical, Geological, Mining, and Metallurgical Engineering. Interviews will be held on campus in November.

The Royal Bank has a large number of jobs available in a wide range of fields. More detailed information can be found at <http://www.royalbank.ca>

For those looking for part-time work, O.A.C. level tutors are required and there are still a good number of work study jobs available on campus.

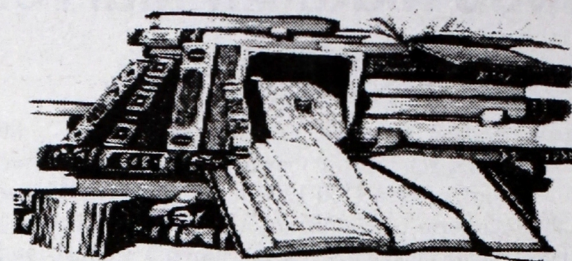

On the international scene, the JET (Japanese Exchange and Teaching) Programme is currently accepting applications for students interested in teaching English in Japan. All applications must be postmarked BY NOVEMBER 14th.

The Toronto Dominion Bank is hosting a reception right here on campus on October 21st. This reception will allow students to discuss career options with various representatives from the TD Bank. Please pick up your invitation at the Placement Centre. (See page 19 for more details)

For more information please check the VAX under local news - lu.placement.centre.jobs or visit the Placement Centre on the second floor of the Parker Building.

Charles Fink
Student Assistant - Placement Centre

The Amiable Librarian

This column is based on questions or suggestions received by staff members of the Desmarais library, either personally or on the "Compliments/Questions/Suggestions" form that may be filled out near the exit of the Library.

Question:

Why are weekly magazines arriving two to three weeks behind? If we lived in the Yukon or the Northwest Territories, I could understand these delays. But we live four hours north of Canada's media centre (Toronto) and these delays are scandalous. I thought this was the best Library in the city of Sudbury but you are doing a great disservice to students.-Stan Sudol.

Dear Stan:

Matters are not as bad as you think. It is true that the library has had some problem with its subscription to Time Magazine for about three months, but this problem is expected to be resolved shortly. The other popular magazine that the library gets are arriving right on schedule. Example: Business week, Maclean's and News weekly normally are in the library by the date stamped on their covers; the Economist is usually a week late, but that is because it comes from Great Britain.

The Amiable Librarian would like to assure you that when each title is received, it is processed by library staff the same day because the staff recognizes that timeless is important to all users. (Did you know that is the reason each day two library staffers, Rick Hauta during the week and Judith Buse on weekends, pick up the financial post, the Globe and Mail, Northern Life, Le Voyageur and the Sudbury Star on their way in to work. That way these papers are immediately available at the Reserve Desk the day they are published).

Why then might you be having problems? Reason: Some current periodicals are shelved on current periodical shelves on the second floor around where some students like to sleep. Others are sent directly to the shelves where the superseded issues are placed. To ascertain whether or not a title that interests you goes to current issues shelves you must check the on-line catalogue (OPAC)

Question:

What's the Lexis-Nexis? My professor keeps telling us to buy a subscription but I am not sure that it is worth it-Interested but Frugal

Dear Frugal:

Lexis Nexis contains the full text of thousands of newspapers, magazines, and journals, some dating back as far as the early 1970's. Example: New York Times from June 1980, the economist from 1975, Maclean's from January 1985, the Canadian Historical Review from January 1993 and Harvard Business Review from 1976. All of these are available on the Nexis; The Lexis part contains the full text of legal cases from around the world as well as umpteen law review articles. The Amiable Librarian would mislead you implying that every periodical you want is available through the service. (A complete list of those available is on loan at the reserve desk for a day). The point is however, that groups of these periodicals may be searched by key word with the result that there is hardly any topic that cannot be picked up through the service. Most who have purchased the service feel they are getting their money's worth-especially first year students who may pay \$30.00 for a Nexis account (\$45.00 for the full, Lexis Nexis service) that is valid until they graduate. If you would like to take the Lexis Nexis for a spin and avoid the library's normal \$10.00 service charge (which may be applied to the purchase of your own account), why not clip this column and bring it in to one of the librarians in the research office.

One search per customer. Offer expires October 31, 1997.

More from Residence

Campus clean-up was rained out on October 4, 1997. But on a positive note, residence students made short work of the cookies provided, ensuring that more garbage was not scattered around the campus. The make up date will be October 19, 1997, helping to kick off Alcohol Awareness Week. Although in typical Sudbury fashion, Campus clean-up Act Two will probably be snowed under.

Alcohol Awareness week

will start on Monday October 20, 1997, with the ever popular info booth which runs all week. Here is your chance to tackle Paulette's infamous mini golf course or eat as much cake as you can without spending a dime. You can also win some great prizes! And making a return this year are the Sumo Suits, you get to become that 400 pounder that you always wanted to be and battle your roommate to death. There will be movies every night in the UCTV Lounge at 9:00pm

and lots of other fun games.

If you didn't know where these cool events are taking place, drop by the SSR/UC res office and have some fun. Stop in and sign the banner, or design your own drinking awareness sign and get lots of free stuff. Is there anywhere off campus where you can get all this excitement for free? I don't think so. Just stop by on student street to see what your missing.

All submissions become the property of Lambda Publications and will thus be subject to editing. Letters submitted must bear the author's full name and telephone number. Names will be withheld upon request. Letters must not be longer than 250 words. Lambda reserves the right to edit for content considered sexist, racist, homophobic, heterosexual or for length.

ROOMMATES DRINKING YOUR BEER?

"SEARCH FOR SASQ" AND YOU COULD WIN A COOL KOKANEE CAN SHAPED FRIDGE OF YOUR VERY OWN.

Keep your Kokanee safe in your own refrigerator. To enter simply find Sasq in the above photograph and circle him. Then complete the ballot portion of this ad and return the entire page to: Ralphs, Laurentian University, Ontario. Contest entries must be received no later than October 26, 1997.

I am a registered student of this university. ☐ Yes ☐ No

Skill testing question: $(13 \times 6 + 10 - 8) =$ _____

Name: _____

Address: _____

City: _____

Postal Code: _____

Telephone: _____

Age: _____

Signature: _____

PRIZE: All participants to correctly identify the Sasquatch will be entered into a draw for the grand prize of one Kokanee can shaped refrigerator per campus (approximate value: \$750). *Note: The winning entrant will be responsible for the arrangement and cost of delivery.

RULES & REGULATIONS: Only registered students who are not employees of Columbia Breweries, any licensed establishment in Ontario or the LCBO/LLBO may enter. The winner will be required to correctly answer, unaided, a mathematical skill testing question. Prizes must be accepted as awarded, and no substitutions will be made whatsoever. Odds of winning depend on the number of entries received by contest closing date. No purchase necessary. Must be of legal drinking age to participate. Made and available in Ontario.

Kokanee
B.C.'s MOUNTAIN BEER is here.

Cliff Claven Special

This week's feature is something a little wacky and fun. The past few weeks have been somewhat serious in content so now it's time to lighten things up a bit. We at the Lambda know that it is getting into crunch time; a lot of essays and assignments are coming due, and everyone has so many readings to catch up on. So why not have a little harmless fun with a trivia feature filled with useless facts and interesting tidbits of information?

This is your opportunity to emulate our favourite barfly, Cliff Claven. Some of the stories are designed to test your trivia knowledge and deductive reasoning, while some of the others are designed to give you even more useless trivia than you already have. It's all done in the name of good clean fun. See, the Lambda does support non drinking activities, despite what you may have heard.

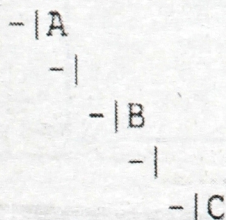

Once you've read through the trivia feature, you may discover that you're a closet know it all and you're addicted to stuff like this. After you find a support group, you can find even more bits of interesting trivia in the public library or bookstores. Speaking as one of the addicted, I highly recommend The Book of Lists, Almanacs, The Guinness book of World Records, and the plethora of other trivia books that are constantly being updated and churned out. The Internet also has a number of sites than can entertain you for hours, I'm not talking about the porno ones either, so get your mind out of the gutter. Read on and enjoy this complete waste of time.

BrainBusters

Have you ever heard of the game Mind Trap? It's a bunch of brain teasing riddles that drive you completely insane as you try in vain to figure them out. Well, there are a bunch of riddles here that are kind of like the ones in that game (if you've never heard of Mind Trap, you need to get out more!). If you're feeling confident, you can challenge your friends to a little battle of the minds and see who can come up with the most right answers in the least amount of time. Sorry, no prizes except bragging rights, unless you start taking bets. If you're not so confident, check page 9 for the solutions to the riddles. On that happy note, start riddlin'

The Wizard and the Three Men

There was this wizard who caught 3 men {let's just say Mr. A, B and C}. The wizard wanted to kill all three of them, but they pleaded and so the wizard gave them a chance. The wizard put the 3 men on a flight of stairs, A first {A is on the top of the flight of stairs} followed by B {B is in the middle}, and then C {C is at the base}, as shown in the diagram.

They were stationed in such a way that A can see B and C, and B can only see C, but can't see A, and C can't see anyone. They were then blindfolded, and on each of their heads he put a coloured cap, either black or white, and only black or white. There will be either 2 black 1 white, or 2 white and 1 black, either way, the three men don't know. All they know is that there will be either a black or a white cap on their own head, and that there will be either 2 white or 2 black caps in total.

So the wizard wants them to tell him what is the colour of the hat that they have on their own head within the next 5 seconds after he removes the blindfold. Anyone who can answer correctly will save the lives of all three men. When the wizard removed the blindfold, B answered after only 4 seconds! He was correct. How did he do it? Hint: Whatever the answer is doesn't matter, even if it is black or white, the most important thing is how he got the answer. Hint: What did A see from his spot at the top?

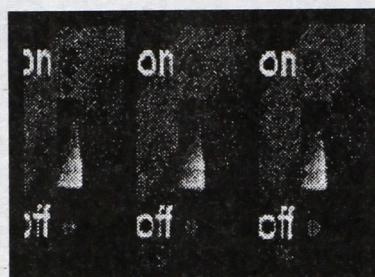

Truth or a Lie?

You are at a fork in the road. One fork leads to Heaven and the other to Hell. There are identical twin sisters, one at each fork in the road. One sister always tells the truth, the other always lies. You may not ask any questions to which you already know the answer (So you can not ask questions like: Is my tie blue?) You can ask a question concerning direction. What question do you ask to take the

path into Heaven.

Light Switches

You are standing in front of a room with a light bulb inside of it. You don't know if the light is on or off. Out side of the room are three switches. You may turn the switches in any way, order etc... that you want to. You stop turning the switches and enter the room. You now know which switch controls the light.

How do you know this?

Illiterate Killer

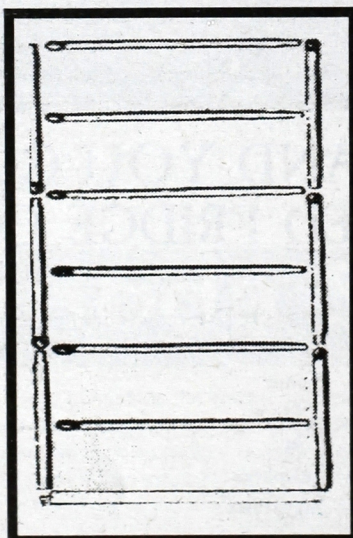

A professor is consulted by his detective friend about a murder; A man had been murdered and suspicion has been directed toward an illiterate under-world character who had been accused of sending the following note, found on the murdered man's desk:

sir john when i seen you i sed i ment bizness i will kil you if the muneay aint here by mundy; all of it yurs truley, XX

The professor noted that the writer of the note, and therefore probably the murderer, was obviously an educated man. This was true and resulted in the apprehension of the real killer. How did the professor know this?

Matchsticks

13 matches are arranged so that they enclose 6 spaces of equal size, see diagram. These matches represent sections of fence and were arranged as shown by a farmer who wanted 6 equal pens for his sheep. One night, a miscreant removed one of the fence sections and rearranged the 12 remaining sections so that they still enclosed 6 pens of equal size.

How did he do it? All 12 matches must be fairly used, with no doubles or loose ends.

Banking Blunder

A man went into a bank and cashed a check. The teller- who was in a hurry, reversed the dollars and cents: that is, she gave him as many dollars as there were cents on the check and as many cents as there were dollars.

The man, who had no other money in his pockets, went out and spent \$3.50. Then he counted his money and found that he still had exactly twice the amount of the original check.

Now, assuming that a bank could really give you more than you asked for (this is a puzzle, remember, and anything can happen in a puzzle), what was the value of the original check?

Word Puzzles

1) Make a good English word out of the letters in; ROAST MULES. No letter is to be used more times than it appears in the original word, and all letters must be used. Just one word can be made, using all ten letters.

2) Work out the following sum in addition, substituting figures for the letters, so that it works out properly. That is assign such values to the letters that E plus D equals Y, R plus N equals E (with or without anything to carry), and so on.

MONEY

Flock of Ducks

A farmer took a flock of ducks to market, and when she got back, her husband asked her how she had made out. She said; "Well, first I sold Mr. Smith half of the flock and half a duck; then I sold Mrs. Brown a third of what was left and a third of a duck; then I met Mr. Robinson and talked him into taking a fourth of what was left and three fourths of a duck; and on the way home I met old man Jones and sold him a fifth of what was left and gave him a fifth of a duck for good measure. I had 19 ducks left that I couldn't sell. There they are."

The question is, how many ducks did that ingenious woman take to the market? It may be pointed out that no duck was divided.

Too Clever

"Receiving no reply to my ring and finding the door unlocked, I went in," said Lynch. "Dawson was seated at his desk, shot through the head. Seeing he was dead, I called the police and remained here."

"Touch anything, Lynch?" asked professor Stiggins. "No Sir, Nothing." The professor made a careful examination of the desk and found that Dawson had been writing a letter at the time of the tragedy. Presumably recognizing his slayer, he had managed to tear off a piece of paper and scrawl "D.A. did thi-" and here it trailed off. Apparently the murderer had not seen this scrap of paper which the professor found under the letter.

Further examination disclosed several kinds of writing paper, a pen tray holding a recently used pen, inkwell, eraser, stamps, letters, and

bills. The gun from which the shot had been fired was on the floor by the side of the chair, and the bullet was found embedded in the divan.

"Well," mused the professor, "this D.A. didn't see that scrawled message and he overlooked something else in his desire to make it appear suicide. Although Dawson could have shot himself, I know it was murder, and I knot the murderer or someone else was i this room after that message had been written. Lynch is beyond suspicion."

How does he know this?

Treasure Hunt

There was a treasure concealed in a lofty cell in an ancient castle. 3 people- a man, a youth, and a small girl- set out one dark night to steal it. The only means of exit from the treasure room was a high window, outside which was a pulley over which was a rope with a basket at both ends. When 1 basket was on the ground, the other was at the window. When a person is in the basket, he/she can't help himself or be helped by anybody else. Unless there was a counter-weight he/she would free fall to a fatal landing on the ground.

The man weighs 195 pounds, the youth 105 pounds, and the girl 90 pounds, and the box of treasure weighs 75 pounds. The weight in the descending basket can not exceed the weight in the ascending basket by more than 15 pounds or the rate of descent would be so great as to cause injury to a person, though not to the treasure. Only 2 persons or 1 person and the treasure can be in one basket at the same time.

How did the three thieves steal the treasure and escape by using the baskets?

The Ex-Wife Murder

"Who shot her?" cried Roger as he rushed into the hospital 3 minutes after his ex-wife died from a bullet through her head. Despite the fact that they had been divorced for 6 months, the former couple were still living together. "Had any trouble recently?" asked the detective? "Well, yesterday, when I told her I was going on a business trip, she threatened to commit suicide. In fact, I grabbed a bottle of iodine from her as she was about to drink it. When I left last evening at 7, however, telling her I was spending the night with friends, she made no objection. Returning to town this afternoon, I called my home and the maid answered."

"She said 'Oh, Mr. Rogers, they took poor mistress to the hospital about half an hour ago. Please hurry to her.' She was crying and I couldn't get anything else out of her; then I rushed here. Where is she?" The detective informed Mr. Rogers that the nurse could assist him. He then turned to his partner and said, "We'd better detain Mr. Rogers. If he didn't shoot her himself, I'm confident he knows who did."

How did he know that?

Editor's note: This one is sooo pathetically obvious that I'm not even putting the solution. If you can't figure this one out in 0.3 seconds than you should most definitely NOT be at university!!!

Test Yourself Against The Best

The official name for the association of people with genius level IQ is Mensa. Those arrogant smarty pants even have their own Quiz book where us common folk can test ourselves against their standards. As a result of space limitations, we obviously cannot reprint the entire quiz, but we can give you a general idea of some of the questions. From there you can pretty well gage your standing in comparison with official geniuses.

The quiz book is divided into several different sections upon which you will be tested. They want to make absolutely sure that there are no flukes and that you really are a qualified genius in all of the "pertinent" areas. The different areas in which you must display expertise include; trivia, vocabulary, analogies, mathematics, reasoning and logic, and classics. They also include a section at the end telling those poor souls who didn't cut it not to feel too bad. Gee, thanks you cocky pricks! Sorry, I got a little carried away. If you feel that you've done well on this little sample, try getting the book and doing the whole thing. May the force be with you.

WARM UPS

1) Domenikos Theotocopoulos is bet-

ter known as who?

2) Where would you be if your restaurant check was in forints?

3) In the novel by Jules Verne, who went around the world in eighty days?

4) If you heard people talking about ullage and botrytis, what would they be discussing?

5) Which one does not belong: George Sand, George Eliot, George Orwell?

MATCH WITS WITH MENSA

(you are supposed to time yourself for this one, but don't bother because you don't have all of the questions)

1) Where is Karl Marx Buried?

2) What do dodo birds and kiwi birds have in common?

3) Which one of the following does not belong? Caravaggio, Corot, Copley, Cellini?

4) Nock, fletching, and shaft. What sport uses these?

5) If you crossed the Kill van Kull from North to South, where would you be?

ANALOGIES

1) 6 is related to 36 as 4 is related to: a) 8 b) 16 c) 24 d) 44 e) 34

2) Books are to libraries as weapons are to: a) tents b) guns c) soldiers d) armories

3) Clouds are to rain as springs are to: a) river b) summer c) weather d) boats

4) Solar is to sun as terrestrial is to a) moon b) stars c) earth d) planets

5) Skin is to people as carapace is to a) lions b) cats c) shellfish d) birds

CLASSICS

1) If a teenager and a half can eat a pizza and a half in a day and a half, how many pizzas can a dozen teenagers eat in three days?

2) How far can a dog run into the woods?

3) I have two coins that add up to \$.55. One of them is not a nickel. What are the two coins?

4) Punctuate the following sentence so that it makes sense: Jim where Bill had had had had had had had had was right.

5) Which is heavier, a pound of gold or a pound of feathers?

CONUNDRUMS

1) If there are 12 one cent stamps in a dozen, how many 2 cent stamps are there in a dozen?

2) There is a family party consisting of 2 fathers, 2 mothers, 1 grandfather, 1 grandmother, 2 sons, and 1 grandson. Only 5 people are there. How is this possible?

3) How many months have 28 days?

4) Your Doctor gives you 6 pills and tells you to take 1 every half an hour.

How long does it take you to use up all of the pills?

5) What word, when you add additional letters, becomes smaller?

ANSWERS

WARM UPS

1) El Greco, the painter

2) Hungary

3) Phileas Fogg (and his valet)

4) Wine

5) George Orwell, all 3 are pen names, but the other 2 are female

MATCH WITS WITH MENSA

1) In London, England

2) They are basically wingless; they can't fly

3) Cellini, who was a sculptor, not a painter

4) Archery

5) On Staten Island, New York, having crossed from Bayonne, New Jersey.

ANALOGIES

1) b, the number 4 squared

2) d, Armories, where weapons are stored

3) a, River, in each analogy, the second word represents the source of the first

4) c, Earth

5) c, shellfish

CLASSICS

1) 24. One teenager can eat one pizza in a day and a half, or two pizzas in three days

2) Only half way, after that, the dog is running out of the woods

3) One of them is a nickel: a fifty cent piece and a nickel

4) Jim, where Bill had had, "had," had had, "had had." "Had had" was right.

5) A pound of feathers is heavier, because it weighs 16 ounces. Metal is weighed in troy ounces, of which there are only 12 to the pound (yes, only a genius would know this).

CONUNDRUMS

1) 12, just the same as there are in any dozen

2) Grandfather, grandmother, son, daughter-in-law, and grandson. The grandfather and son are both fathers, the grandmother and daughter-in-law are both mothers, and the son and grandson are both sons.

3) Every month has 28 days; most of them also have more.

4) Two and a half hours

5) Small. (you can get creative and say 'meter' and 'millimeter')

Everything You Never Wanted To Know

Have you ever wondered why something is the way it is? Or where something came from? But you never cared enough to actually go and find out. Well, here's a few things that I sort of wondered about at one time or another, or never wondered about but still thought that it was cool to know. These come from a book of Imponderables called "When did wild poodles roam the earth?" Check out the series for all sorts of great tidbits that you always wanted to know.

WHY IS THERE NO BETTY RUBBLE CHARACTER IN FLINSTONES MULTIVITAMINS?

According to William D. Turpin, director of consumer relations for Multivitamins' manufacturer, Miles Inc.: "The current group of Flinstones characters was selected upon research of the popularity of each character with children. As a result of this research, it was determined that Betty Rubble is not as popular with the majority of the children as the other characters." Even Dino and the Flinstone family car were more popular (I guess Betty should have dropped that annoying giggle and started giving out candy or something).

WHY DO ROACHES RUN AWAY WHEN A LIGHT IS TURNED ON?

Cockroaches are nocturnal animals that are genetically programmed to scurry away when exposed to light. The urban roach is well adapted to its environment as it pillages the food in your house while you're sleeping in the dark. Roaches may also be running from humans. They have very poor eyesight and rely on their sense of vibration to detect danger (this one should hit home to students who are too busy doing 'school work' to clean their place).

WHAT ARE THOSE NOISES WHEN THE HOUSE 'SETTLES' AT NIGHT?

Houses aren't as stable as you'd like to believe. According to the American institute of Architecture, all of the following things can and do move; the soil underneath the foundation begins to buckle, materials that were wet at installation shrink as they harden (things like mortar, plaster...), some dry materials expand and push against other things, structural elements like beams and pillars can deflect under weight, natural elements can cause movement, wood and concrete start to sag, materials that expand and contract in different temperatures. Architects usually plan for all of these types of movements and more when they are designing buildings (let's just hope they're not on crack and the building falls apart).

WHAT IS THE PURPOSE OF THE LITTLE INDENTATION IN THE CENTRE OF OUR UPPER LIPS?

That little indentation is called the philtrum and it is there for absolutely no good reason that anyone can figure out (that could be a fun game; try and think up as many uses for the philtrum as possible).

WHY DO THE TAGS ON THE SIDE OF THE BACK POCKET OF LEVIS JEANS COME IN DIFFERENT COLOURS?

The tabs, as they are officially called, were originally created to distinguish Levis from the competition. There are now 4 different coloured tabs (red, orange, silver, and cream) and they signify the type of construction used to manufacture the jeans. Red is used for the classic, detailed construction, orange is used for jeans with a slightly less expensive finishing, silver is used for the "fashion forward", contemporary jeans line (usually the most expensive jeans), and creme is used for jeans that are naturally coloured.

WHAT GOOD DOES A "FALLING ROCK" SIGN DO?

When most people see a falling rock sign, they figure that it's sort of pointless, what exactly are you supposed to do if rocks start falling? It'll be too late to do anything. You are actually supposed to watch for rocks that have already fallen and are now lying on the road, not ones that might be tumbling down the side of the rock. The idea behind this sign is that it will make drivers more anxious and therefore make them more cautious.

WHY DO DISPOSABLE LIGHTERS HAVE 2 SEPARATE FLUID CHAMBERS, EVEN THOUGH THE FLUID CAN FLOW BETWEEN THEM?

BIC responds to this question by stating that it is an optical illusion; "The wall of plastic that makes up the fuel reservoir portion of the main body has to be reinforced with a cross rib or web to assure that this containment vessel will exceed the high pressure of the fuel. This cross rib gives the appearance of 2 separate chambers.

IS THERE ANY DIFFERENCE BETWEEN MEN'S AND WOMEN'S RAZORS?

The shave angle of the two are different, meaning the men have a greater angle on the blade, what the razor industry refers to as "the aggressive exposure". This is so for two reasons; 1) men's beards are tougher than the hair that women are shaving, and require more effort to cut, and 2) because complain to the company more frequently than men do about nicks and cuts. Another major difference between the razors is women's razors have a greater arc in the head of the razor so that women can see more of the skin on their leg as they shave (it would appear that complaining has gotten women the

better razor, you men better start speaking up or switching to the other side).

WHY DO WE FEEL DROWSY AFTER WE EAT?

After we eat a big meal, the blood supply concentrates around the digestive organs and intestinal system, reducing the blood supply for other activities. We tend to slow down metabolically and in our ambitions. Equally important, during digestion, foods are broken down into many chemicals, including amino acids such as l-tryptophan, which helps induce sleep.

IN WHAT DIRECTION ARE OUR EYES FACING WHEN WE SLEEP?

Upward, usually. Our eye muscles relax when we are asleep, and the natural tendency is for the eyes to roll back above their usual position, this is known as Bell's Phe-nomenon. Of course, when we experience rapid eye movements during sleep, our eyes dart back and forth.

WHAT IS THE MEANING OF THE NUMBERS INSIDE THE ARROWS ON RECYCLABLE PRODUCTS?

Both the numbers and the letters below signify the composition of the plastic used in bottles and other containers. The most common plastics receive the lowest numbers. The letters are abbreviations of the dominant resin from which the container is made. #1=PET- used in plastic pop bottles, #2=HDPE- high density, used in plastic milk and juice jugs, #3=V- vinyl, #4=LDPE- low density, #5PP, #6-PS, #7=other.

WHY ARE THERE NO PURPLE CHRISTMAS LIGHTS?

Purple, according to marketing studies, is one of the least favourite colours among consumers. The other contributing factor, for those of you out there who do like purple, is a

matter of physics. Purple has the shortest wavelength of light and is not easily visible to the human eye. Purple lights also make the other lights look washed out, ruining the effect of pretty Christmas lights.

WHAT DOES THE 'Q' IN 'Q-TIPS' STAND FOR?

Q-Tips were invented by Leo Gerstenzang in the 1920s. It was originally intended for use in baby care, you know, cleaning and such. They are packed in the sliding box like that so that a parent of a small child can open the box and remove a Q-tip with one hand. The Q stands for quality.

WHY DO WOMEN PUT PERFUME ON THEIR WRISTS?

Have you ever passed by a cosmetics counter in a department store and seen women putting perfume on the inside of their wrists and then sniffing intently? Why not on their fingers? The back of their hands? Their arms? Their underarms? Or even on their faces, like men do with aftershave or cologne?

What do they know that men don't know? A cursory polls of some females indicated that most of them had no idea as to why they put perfume on their wrists. But it turns out that there is a method to their madness. Irene L. Malbin of the Cosmetic, Toiletry, and Fragrance Association, explains; "Women put perfume on their wrists because there is a pulse point there. Pulse points are located wherever the pulse of the heartbeat is closest to the surface of the skin. The heat generated by the pulse point will intensify a perfume's impact."

Other pulse points include: behind the ears, the nape of the neck, the bosom, the crook of the elbows, behind the knees, and at the ankles.

Stupid But Fun

The following are from The People's Almanac Book of Lists, 90's version. This is a silly book filled with lists of useless trivia. It makes for hours of fun when you are procrastinating and need something other than your major essay to occupy yourself with. You will discover things that you never wanted to know and will never get out of your head. The fun part is infecting all of your friends with this pointless information. So read on and enjoy.

22 Early Names of Famous Music Groups

EARLY NAMES	FAMOUS NAMES
Angel and the Snakes	Blondie
Composition of Sound	Depeche Mode
Big Thing	Chicago
Artistics	Talking Heads
Carl & The Passions	Beach Boys
Primettes	Supremes
Tom & Jerry	Simon and Garfunkel
Johnny & the Moondogs	Beatles
Caesar and Cleo	Sonny and Cher
Paramours	Righteous Brothers
Earth	Black Sabbath
Bangs	Bangles
Beefeaters	Byrds
Falling Spikes	Velvet Underground
Sparrow	Steppenwolf
My Backyard	Lynyrd Skynyrd
The New Journeymen	Mamas and the Papas
The Elgins	Temptations
The Four Aces of Western Swing	Bill Haley & his Comets
The Golliwogs	Creedence Clearwater Revival
The New Yardbirds	Led Zeppelin
Golden Gate Rhythm Section	Journey

25 Greatest Films of all Time (according to eighty film critics, writers, and directors from 22 countries)

- 1) Citizen Kane/ Orson Wells
- 2)The Rules of the Game/ Jean Renoir
- 3)Battleship Potemkin/ Sergei Eisenstein
- 4)Eight and a Half/ Federico Fellini
- 5)Singin' in the Rain/ Gene Kelly & Stanley Donen
- 6)Modern Times/ Charles Chaplin
- 7)Wild Strawberries/ Ingmar Bergman
- 8)The Gold Rush/ Charles Chaplin
- 9)Casablanca/ Michael Curtiz
- 10)Rashomon/ Akira Kurosawa
- 11)The Bicycle Thief/ Vittorio De Sica
- 12)City Lights/ Charles Chaplin
- 13)Children of Paradise/ Marcel Carné
- 14)Sunrise/ F.W. Murnau
- 15)The Earrings of Madame De.../Max Ophuls
- 16)Grand Illusion/ Jean Renoir
- 17)The Searchers/ John Ford
- 18)2001: A Space Odyssey/ Stanley Kubrik
- 19)Some Like it Hot/ Billy Wilder
- 20)Ivan the Terrible Parts I & II / Sergei Eisenstein
- 21)Jules and Jim/ Francois Truffaut
- 22)Stagecoach/ John Ford
- 23)Vertigo/ Alfred Hitchcock
- 24)The Seven Samurai/ Akira Kurosawa
- 25)Tokyo Story/ Yasujiro Ozu

11 Foods & Their Filth Levels

- 1)CHOCOLATE; CHOLATE LIQUOR; up to 60 microscopic insect fragments per six 100-gram samples or up to 90 fragments in one sample; or an average of more than 1 rodent hair in a set of 6 samples or up 4 hairs in any 1 sample.
- 2)COFFEE BEANS; 10% insect infested, insect-damaged, or moldy
- 3)FIG PASTE; 13 insect heads in two 100-gram samples (mmm, chewy)
- 4)FISH (FRESH FROZEN); 5% of fish fillets with "definite odor of decomposition" over 25% of fish area (who is the sucker who checks that stat out?); or 20% of fish fillets with 'slight odour of decomposition" over 25% of fish area.
- 5)MUSHROOMS (CANNED); up to 20 maggots per 100 grams of drained mushrooms.; up to 5 maggots 2 millimeters or longer; or 75 mites (well, you do know what they're grown in)
- 6)PEANUT BUTTER; average of 30 or more insect fragments per 100 grams. Average of 1 or more rodent hairs per 100 grams. (I wonder if it sticks to their mouths too)
- 7)PEPPER; average of 1% insect-infested or moldy by weight; or 1% of excreta per pound
- 8)POPCORN; either 1 rodent pellet per sample or 1 rodent hair per 2 samples; or 2 rodent hairs per pound or 20 knawed grains per pound, and hairs in 50% of samples. Popcorn may contain up to 5% of field corn by weight (you get so much more than you payed for)
- 9)SPINACH (CANNED OR FROZEN); in 100-gram samples, either 50 aphids, thrips, or mites, or 8 leaf miners (never heard of 'em, but they sound bad); or in 24 pounds, 2 spinach worms, or worm fragments, whose total length is 12 millimeters.
- 10)STRAWBERRIES (FROZEN, WHOLE, SLICED); mold count of 55% in half of the samples
- 11)TOMATO PASTE (PIZZA AND OTHER SAUCES); in 100-gram samples, either 30 fly eggs or 15 eggs plus 1 larva; 2 larvae per 12 samples; or mold count averaging 40% (30% for pizza sauce) in 6 samples (with all those eggs, pizza should be a break-fast food).

7 Famous People Expelled From School

- 1) *Richard Prior, comedian* -expelled from catholic grammar school because his grandmother ran a string of brothels, and expelled from high school at sixteen for punching a science teacher.
- 2) *Gustave Flaubert, author* -for organizing protests and revolts in his philosophy class at the College Royale
- 3) *Tina Brown, magazine editor* -former editor of Vanity Fair and The New Yorker, was expelled from three boarding schools before she was sixteen for various acts of unruly behaviour
- 4) *Jean-Claude Kelly, French ski champion* -expelled at age fifteen for chronic truancy because he was skiing instead of going to school (can you blame him?)
- 5) *Diana Nyad, US swimming champion* -expelled from college for pranks like parachuting from a fourth storey dorm window (don't get any ideas)
- 6) *Jackie Collins, novelist* -expelled from boarding school at sixteen for truancy, smoking, selling dirty limericks, and waving at the neighbourhood flasher, she eventually sent her own daughters to the same school.
- 7) *Roger Daltrey, musician* -expelled as a boy for being a misfit and not following the rules.

9 Unusual Animal Mating Habits

- 1) *Geese*: 2 male geese may form a homosexual bond, but a female may interpose herself between them and be quickly fertilized. They will accept her, and weeks later the happy family of three will be taking care of a new goslings (I guess homosexuality isn't against nature after all!)
- 2) *Dolphins*; they engage in extensive foreplay, nuzzling, rubbing and giving love bites (take notes guys). Captive male dolphins masturbate freely, even if females are present. One woman keeper made news by occasionally masturbating her male dolphins when they approached her with an erection.
- 3) *Penguins*: they prefer to be "married" but they suffer long separations due to their migratory habits. When reunited, a pair will stand breast to breast, heads thrown back, singing loudly, with outstretched flippers trembling (who wouldn't love a greeting like that?). 2 weeks after a pair is formed, their union is consummated. The male will make his intentions known by laying his head across his partner's stomach. They go on a long trek to find privacy, but the actual process of intercourse takes only three minutes (sound familiar?). Neither penguin will mate again that year.
- 4) *Rhinoceros*: As the female enters her mating period, her vulva swells and she makes shrill whistling noises in the presense of a male. He responds with deep, heaving sighs. Next, he charges her head on and she meets the attack. Again and again they rush each other, bellowing with anger and butting fiercely. They continue for an hour, risking serious injury (some twisted foreplay they've got going on). If the female finally decides the male is worthy, she presents her rear to him, he enters her with his 2 foot-long penis (ouch!!!). He remains mounted for over an hour, ejaculating every ten minutes (what a champ).
- 5) *Ticks*: A female tick needs at least one blood meal in order to form her eggs. While she is feeding, the male sneaks under her belly and prepares to 'make love' (sounds more like a rat or a weasel). Unfortunately, he doesn't have a penis, so he wiggles around inside her vagina with his nose. When her opening is large enough, he turns around and deposits a packet of sperm from his rear onto the entrance of her orifice. Then he uses his snout to push it deeply into her vagina (it's enough to bring a tear to your eye).
- 6) *Skunks*; The male skunk is rather aggressive as he tries to force himself on his mate. However, the female skunk will not mate until she is ready (you go girl). The male enters her with his tiny penis- inch-and-a-half long, and no thicker than a pencil lead (we know where you're coming from sista').
- 7) *Bedbugs*: The male bedbug does not penetrate the female's vagina with his large, warped penis. Instead, he uses it to break the shell on her back and deposit his sperm, which migrates to special pouches in her body for storage. A female who mates with more than 6 males is likely to die from her wounds (GROSS! 'nuf said). Homosexuality is rampant among bedbugs, and some males have special organs to receive the sperm of other males. An inseminated male bedbug may then ejaculate both his own sperm and that of his homosexual male partner into a female.
- 8) *Ducks*: Male ducks become sex maniacs in the spring, trying to force themselves on any female they see (they haven't heard of sexual assault, obviously). Once mated, they stay 'married' all season. A 'husband' may not try to prevent his 'wife' from being chased by suitors, but he may follow her to be sure he doesn't lose her. The female duck would rather die than be unfaithful, and may hide in the grass all day to avoid her suitor (she could just beat the crap out of him).
- 9) *Pigs*: The term screwing may have originated with the observation that the male's penis is a foot and a half long, and the tip is spirally twisted into a kind of corkscrew (kinky). When he enters the female, the tip roates until it is tightly lodged inside her. His repeated ejaculations are spectacular- each time, he injects her with up to a pint of semen (that's why you never see pigs performing fellatio).

Solutions to Riddles

The Wizard and the Three Men

The wizard gave them 5 seconds, however, B only answered in the fourth second, which means that A, on the top of the stairs, did not know the right answer. Being on the top, A, you are able to see all of those below, B and C, however, you still do not know the colour of your own hat. This means that the colour of the hat of B and C are different.

B must have thought of this and is very sure that C has a hat of a different colour than his (B's), and since he could see the person in front, if the person in front had a white coloured hat, then his is obviously black, or vice versa.

Truth or a Lie?

You could ask something like this: What would your sister tell me if I asked her where this path leads? Let's call the sisters *Truth* and *Lie*. Let's imagine that *Truth* is guarding the path to Heaven and *Lie* is guarding the path to Hell. If you ask *Truth* this question, she would tell you what *Lie* would tell you "hell", so the total answer would be 'hell'. If you asked *Lie* this question, she would NOT tell you what *Truth* would tell you ('Heaven') so the total answer would also be 'hell'. Therefore, you should take the path from which the sister answers 'hell'...(To see this acted out, get the

movie Labyrinth with David Bowie)

Light Switches

You turn 2 switches on and 1 switch off, you wait...Just before entering the room, you turn 1 switch from on to off. If the light bulb is warm, but off, it has to be that last switch that you turned off just before you went into the room. If the light is on, it has to be the switch that you left on. If it is cold and off, it has to be the switch that was always off.

Illiterate Killer

The note, although misspelled, poorly expressed, and written by a seemingly illiterate hand, was properly punctuated in 2 places. A semicolon and a comma would not have been used has the writer been as ignorant as the rest of his letter indicated. Forces of habit betrayed him.

Match Sticks

Arrange the matches as shown here and you will have 6 pens, all of the same size, enclosed by 12 matches.

Banking Blunder

The original check was for \$14.32. Reverse these figures and you get \$32.14, from which you subtract \$3.50, the result will be \$28.64, which is double \$14.32. Where most people slip up is here: they realize that the number of cents in the original

check must be twice the number of dollars plus 3, but they forget that a 1 must be carried to complete the subtraction of \$3.50 so that the number of cents must be twice the number of dollars plus 3 plus 1.

Word Puzzles

From ROASTMULES you can make the word SOMERSAULT. As for SEND MORE MONEY, the values are as follows: 1(M), 2(Y), 3(-), 4(-), 5(E), 6(N), 7(D), 8(R), 9(S), 0(O). Obviously you saw that all the digits

But the previous addition was O (zero) plus E, which could never have 1 to carry in its result; therefore S was 9 and not 8.

With these 3 values assigned, it was obvious that N was one more than E. Zero plus E gave N, so there must have been 1 to carry from the addition before. And in that same previous addition R plus N gave E. Now 9 plus anything results in the same thing less one (9+8=17, in which you put down 7 and carry 1, and 7 is 1 less than 8), but we have already deter-

mined that S is 9. Then R has to be 8, and 1 is carried from the first addition. A few trials will show that 5 and 6 are the only values that will satisfy E and N.

Flock of Ducks

There must have been 101 ducks in that flock. she sold half the flock

and half a duck (fifty and a half plus a half equals fifty-one), leaving 50; then she sold a third of these and a third of a duck (sixteen and a two

thirds plus one third equals 17), leaving 33; then she sold a quarter of these and three quarters of a duck (eight and one quarter plus three quarters equals 9), leaving 24; then she sold fifth of these and a fifth of a duck (four and four fifths plus one fifth equals 5), which left 19 that she brought home.

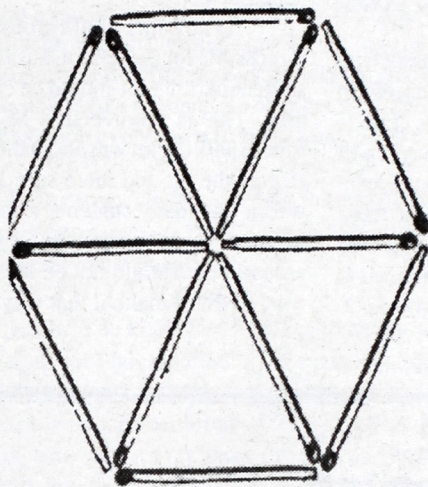

Too Clever

The professor knew someone had been scrawled because the pen with which it was written was found in the pen tray. Dawson died before he finished the message, therefore he could not have placed it there himself.

Treasure Hunt

The best answer requires 11 manipulations, which may be tabulated as follows:

- 1)Treasure down. 2)Boy down-treasure up. 3)Youth down-boy up. 4)Treasure Down. 5)Man down-youth and treasure up. 6)Treasure down. 7)Boy down-treasure up. 8)Treasure down. 9)Youth down-treasure up. 10)Boy down-treasure up. 11)Treasure down.

were not represented and that M was 1. Now if M (1) plus S gave a result in 2 figures, S had to be 8 or 9; and no matter which it was, O had to be zero.

No Feature next week Sorry.....

World Records

People are constantly setting and breaking world records in just about any area imaginable. And believe you me, there are even areas that you would never even imagine, but someone at some time thought it would be worth while to set a record. These are stories of the phenomenal talents of people, and animals, as well as the pure freakish abilities or accidents of nature. Each story offers an insight into the profound weirdness and oddities of human nature. So enjoy other people's accomplishments and start planning your own record breaking feat.

HANDS, FEET, AND HAIR

-Longest fingernails: fingernails grow at a rate of about 0.02 in. a week- four times faster than toenails. The aggregate measurement of those of Shridhar Chillal, of India, on Mar. 3, 1992 was 195 inches for the five nails on his left hand; thumb 46 in., index finger 34 in., middle finger 37 in., ring finger 40 in., and pinkie finger 38 in. He last cut his nails in 1952.

-Balancing on one foot: the longest recorded duration for balancing on one foot is 45 hours 25 mins. by Leslie Silva at Negombo, Sri Lanka from April 6-8, 1991. The disengaged foot may not be used for support or balance.

-Longest hair: Human hair grows at a rate of about 0.5 inches a month. If left uncut, it will usually grow to a maximum of 2-3 feet. The hair of Diane Witt of Worcester, MA measured over 12 feet 2 inches in May

1992. This is the longest documented length of hair

MISCELLANEOUS ENDEAVORS

-Barrel rolling: The record for rolling a full 36-gallon metal beer barrel over a measured mile is 8 min. 7.2 sec., by Phillip Randle, Steve Hewitt, John Round, Trevor Bradley, Colin Barnes, and Ray Glover of Haunchwood Collieries Institute and Social Club, Nuneaton, Great Britain on Aug. 15, 1982.

-Bed pushing: The longest recorded push of a normally stationary object is of 3,233 miles, in the case of a wheeled hospital bed by a team of 9 employees of Bruntfield Bedding Centre, Edinburgh, Great Britain from June 21-July 26, 1979.

-Crawling: The longest continuous voluntary crawl (progression with one or the other knee in unbroken contact with the ground) on record is 31.5 miles, by Peter McKinley and John Murrie, who covered 115 laps of an athletic field in Great Britain on Mar 28-29, 1992. Over a space of 15 months ending on Mar. 9, 1985, Jagdish Chander, 32, crawled 870 miles from Aligarh to Jamma, India to propitiate his revered Hindu Goddess, Mata.

-Bubble: David Stein of New York City created a 50 ft. long bubble on June 6 1988. He made the bubble using a bubble wand, dish washing liquid, and water.

MORE MISCELLANEOUS ENDEAVORS

-Lightening-most times struck: The

only man in the world to be struck by lightening 7 times is ex-park ranger Roe C. Sullivan, the human lightening conductor of Virginia, USA. His attraction for lightening began in 1942 (lost his big toenail), and was resumed in July 1969 (lost his eyebrows), in July 1970 (left shoulder seared), April 16, 1972 (hair set on fire), Aug. 7, 1973 (hair set on fire again and legs seared), on June 5, 1976 (ankle injured), and finally, on June 25, 1977, while fishing (chest and stomach burns). In September 1983, he died by his own hand after being rejected in love.

-Spitting: Randy Ober spat a tobacco wad 47 ft. 7 in. at the Calico 5th annual Tobacco Chewing and Spitting Championships, held on April 4, 1982. The record for spitting a watermelon seed is 68 ft. 9 in. by Lee Wheelis on June 24, 1989.

-Scarf: the longest scarf ever knitted measured an amazing 20 miles 13 ft. long. It was knitted by residents of Abbeyfield houses in Great Britain and was completed on May 29, 1988.

FOOD

-Banana split: the longest banana split ever created measured 4.55 miles in length, and was made by residents of Selingrove, PA on April 30 1988.

-Jello: The world's largest jello, a 7,770 gal. watermelon flavoured pink Jello made by Paul Squires and Geoff Ross, worth \$14,000 was set in Queensland Australia on Feb. 5, 1981 in a tank supplied by Pool Fab.

-Popcorn: The largest container full of popcorn was one with 5,979.33

cubic feet of popped corn. It was just over 19 ft. in height. It took the staff of United Cinemas International in Derby, Great Britain three days to achieve the record, beginning their attempt on Aug. 23, 1991 and completing it on Aug. 26.

-Hottest Spice: the hottest of all spices is believed to be habanero, belonging to the genus *capiscum*, found mainly in the Caribbean and the Yucatan area of Mexico. A single dried gram will produce a "detectable heat" in 440 pounds of bland sauce.

LARGEST CHOCOLATE MODEL. The large chocolate model was one weight 8.818 lbs. 6 oz., the shape of a traditional Spanish sailing ship. It was made by Grems Provincial de Pastisseria, Confeiteria i Bolleteria school, Barcelona and measured 42 ft. in x 27 ft. 10 in. x 8 ft. 2 in. It was exhibited at an international fair in the city of February 1991.

WHISKEY BOTTLE COLLECTION. Claive Vidiz, President of the Brazilian Whiskey Collector's Association, in his museum specially built to house his collection of 2,025 full original Scotch whiskey bottles.

I have a couple of issues about the parking situation around this school. There isn't much I can do myself, but once it gets dragged into the ring, someone always seems to sit up and notice.

The first thing I have noticed happening many times in the pit and at other parking lots. People sit in their cars outside the lot waiting for someone to use their card to go in, then they gun it through the gate before it comes down. This just happened to me again the other day. I paid my money to park on school grounds and have a spot to park in when I arrive, so why the hell should people be able to park for free instead of paying for a pass?

There is no real way to make it so they can't do this, except my way! Someone tried this the other

Get In the Ring

day, so when I went through the gate, I slammed on my brakes forcing them to stop and the gate come down without them making it through. If that person had rammed me, they would have had to explain why they were following so close as to hit me, and probably why they were trying to get into the pit without paying. And if that person is reading this, next time you shoot me the finger for not letting you into the pit for free, you had better have the balls to get out of your vehicle and back that finger up. I paid, you didn't, so all I can say to you is @\$%\$ OFF!

Second is the cars parked up and down the middle of the rows in the pit. What the hell is this crap. Is everyone so lazy that they can't walk an extra twenty or thirty feet to get to their classes. A lot of these cars are parked so close to one side or the other that it is very difficult to get your car out of your own spot.

Last year my roommate had a car towed because she could not get her car out. Don't be so lazy! There are many spots in the pit that are always open since everyone wants to park right up front.

I don't know why security even lets these cars park this way. It's not too bad right now, but once the snow starts and the room in the pit shrinks there are going to be a lot of cars who can't get out because of these lazy asses. I know this isn't a very well regulated parking lot (hence the name, The Pit) but it's getting ridiculous.

I know this would probably be impossible for the school, but another student parking lot should be considered. This is a university. My high school parking lot was about the same size as the pit and there sure as hell weren't as many students who drive as there is at Laurentian. Parking around here should not be an all out war, so don't make it that way.

Sitting on the Corner of Durham and Cedar

by Dylan Callens
Contributor

The other day I was thinking to myself, "What are the most important questions in life?" I came up with two: How much do you like Winnie the Pooh and how often do you change your underwear? Most people are willing to admit that Winnie the Pooh is the coolest, but many have a hard time with the second question.

I change my underwear once a day, assuming I remember. Every now and again it has to wait until the morning because when it gets late at night I am forgetful. The longest I've worn a pair of underwear was probably about thirty-two hours. Not too long, but after that I can no longer take it.

By now you are probably wondering what underwear has to do with downtown, but they are connected. I was sitting on the corner of Durham and Cedar last Saturday chatting with the lovable hot-dog girl. As we chain-smoked and exchanged anecdotes I started looking at people walking by. The first thing I thought was: how often do these people change their underwear?

My friend, Nigel, walked by and I had to ask him the question. His response was simply, "You're nuts, man."

I am no closer to discovering the ways of life because people refuse to answer my question. I am more depressed state I continued to

talk to the lovable hot-dog girl when, miraculously, she asked, "How often do you change your underwear?"

I don't think she heard me ask Nigel this question, so it was yet another bizarre coincidence. I told her the longest I had gone was thirty-two hours. She thought I was dirty for going so long without a fresh pair. I couldn't help but ask, "How about you?"

Can you believe that she changes her underwear twice a day? It's ridiculous. How clean does underwear have to be?

A man that the lovable hot-dog girl knew passed by so she asked him, "How often do you change your underwear?" He wanted to know why but since there was no reason, he admitted, "Once a day."

So, Nigel, am I still nuts? Do you see how important this question is?

Perhaps I have the question to Douglas Adams' answer. How often do you change your underwear? Forty-two. Well, maybe not. At least I had fun sitting on the corner of Durham and Cedar.

PS - Congratulations to Jocelyn who made it official at Cooke House the other day. She is out of the closet and fully heterosexual. Also, we should all have a moment of silence for the death of my pets, Spidermin and Fly Guy.

Next week: *Big Thunder vs. Townhouse: Is this a joke?*

COMMUNIQUE

par Sarah Viau

Un diplômé de la Laurentienne est le premier récipiendaire d'une bourse de 52,00 \$

Scott Brooks, qui vient juste d'obtenir sa maîtrise en sciences à l'Université Laurentienne, a reçu la première bourse fédérale collective en biosystematique, décernée par le Musée canadien de la nature. Le 17 400 \$ par année pour une période de trois ans appuiera le travail de M. Brooks en biosystematique - l'étude scientifique de la diversité des organismes et des liens évolutifs entre eux - à la McGill Université de Montréal.

Cette bourse a été créée en 1995 avec l'objectif de favoriser la recherche de troisième cycle au Canada dans le domaine de la biosystematique. Les travaux de recherche de M. Brooks vont dresser l'arbre genealogique des mouches à longues pattes, une famille commune mais peu connue d'insectes nordiques. De nombreuses entres eux n'ont jamais été nommées ni décrites scientifiquement.

L'importance de ces mouches dans les écosystèmes canadiens signifie qu'en les comprenant mieux, nous pourrions les utiliser comme des indicateurs clés de la santé des écosystèmes. Les insectes me fascinent par la diversité de leurs formes et

j'éprouve beaucoup de respect pour ces créatures à l'aspect extraterrestre" a déclaré M. Brooks.

Pour sa thèse de maîtrise en sciences, M. Brooks a étudié les divers insectes trouvés sur une galle de roses sauvages et il a décrit le processus anatomique lié à la modification de la croissance des plantes. Les nouvelles découvertes expliquées dans la thèse de M. Brooks paraîtront bientôt dans les journaux scientifiques *The Canadian Entomologist* et *The Canadian Journal of Botany*.

Scott Brooks a travaillé comme adjoint à la recherche dans le laboratoire de M. Joe Shorthouse, entomologiste au département de biologie. Selon M. Shorthouse, "cette bourse permettra à Scott d'entreprendre des recherches dans un secteur très négligé de la science canadienne. Elle témoigne de la qualité des jeunes scientifiques diplômés de l'Université Laurentienne".

Découvrir l'histoire des rues du centre-ville de Sudbury

Le lancement du volume *Noms du rue du centre-ville de Sudbury / Street Names of Downtown Sudbury*, a eu lieu le jeudi 9 octobre. C'est l'oeuvre de M. Lionel Bonin, directeur de la bibliothèque J.N. Desmarais de l'Université

Laurentienne, et de Mme Gwenda Hallsworth, auteure et historienne locale. M. Laurence Steven, professeur d'anglais à l'Université Laurentienne, fut l'éditeur.

Ce livre bilingue enrichait la documentation partant sur l'histoire de la municipalité de Sudbury. "Les noms de nos rues témoignent des personnes et des événements qui exercent une influence sur nos vies tant sur le plan local que provincial, national et international," explique M. Steven. "Ils nous aident à rappeler le passé, marquer le présent et orienter l'avenir: les noms de rue reflètent l'évolution de nos valeurs culturelles. Que vous soyez historien, mordu de l'histoire ou simplement à la recherche de renseignements sur la rue de votre enfance, *Noms de rue du centre-ville de Sudbury / Street Names of Downtown Sudbury* vous permettra de voir votre ville d'un oeil nouveau.."

On peut se procurer une copie du livre pour la somme de 20 \$ en communiquant avec Your Scrivener Press au 522-5126. Ce livre sera aussi bientôt en vente dans certains magasins de Sudbury. De plus, le grand public sera invité à des séances de dédicace de livres qui auront lieu prochainement à divers endroits au centre-ville.

Jody Williams, of the United States, has been selected as 1997's recipient of the Nobel Peace Prize. Williams was one of the architects of the movement which resulted in the international treaty against anti-personnel land mines signed last month in Ottawa. There is currently an estimated 100 million "live" land mines situated in 65 countries around the world. Asked, on Friday's National, if the award would shame the Clinton administration into signing the accord, Williams replied that the President should not be shamed by the Nobel Prize but for abdicating "his control of foreign policy to the Pentagon." Also considered for the Prize was Canada's Minister of External Affairs, Lloyd Axworthy, for his efforts in the campaign against land mines.

Sexual assault is precisely the type of offense that the proposed Student Code of Conduct is ill-equipped to deal with effectively. Knowing that criminal proceedings will be lengthy and will provide little protection for the victim in the interim, the Code proposes to instill by establishing a framework to deal internally with such conflicts. However, by the time the mandated proceedings of the judiciary panel and the appeals panel have run their course, the alleged victim and perpe-

trator will have endured months, yes months, of discomfort. My critics will say, "Ah, but there is the emergency ban provisions to protect the student body from particularly dangerous offenders." Yes, there is. And these extraordinary powers already exist in the executive administration of the university; in fact, the Code itself is being sold by its appeals provisions against such arbitrary power. But, in truth, there is no effective appeal against the emergency ban provisions, so that the Code is in the ambiguous position of providing neither a new mechanism to deal effectively with allegedly dangerous "offenders" nor an appeals mechanism against such arbitrary power.

Marriott and LU ought to be ashamed of themselves. On Thanksgiving weekend, while the boys from the ivory tower were stuffing themselves with their turkeys, LU students who do not have the resources to go home were left to eat chocolate bars and potato chips (provided of course that they had change!). Yes, once again, the Hitching Post and the convenience store at the residence could not wait for the opportunity to lock their doors. Does Marriott mention this when they sell "meal plans"? Shame. Shame on you all.

What's Up!

by Christina Hayden
VP Services, SGA

Over the past couple of weeks, the SGA/AGE has taken on the campus starting with Aids Awareness Week. On Sunday, September 28, the executive participated in the annual Aids walk-a-thon. The turnout was amazing and the participants of the walk received a certificate upon completion. After the walk was completed, live entertainment was provided and the fun began. On Monday, the awareness was turned to the campus with a panel of speakers in a talk show set-up. The speakers included a student from Laurentian, a man living with the HIV virus, and Vicky from Access Aids Community of Sudbury. The lunch hour setting in the Pub provided an atmosphere for students to ask questions. The festivities continued on Tuesday with the inter-university hopscotch competition. For every student that participated, the SGA/AGE donated a dollar to Access Aids. Wednesday was Aids-opoly in the Pub Downunder. Students were asked questions on Aids and the HIV virus. The aim of the week was to create awareness around AIDS and HIV and to realize that we are all affected in some way. The week ended with a celebration of participation on Thursday during lunch.

On Wednesday, October 8, Laurentian Athletics and the SGA/AGE teamed up to host the first ever pep rally. The aim of this event was to introduce the varsity athletes to the students. We have a lot of very talented athletes at our school and we should be proud of their accomplishments. We see them walking to class but we really don't know who they are. You don't see them in the Pub, but you can see them on the court, rink or field. The student involvement for the pep rally was amazing and the athletes seemed to enjoy themselves. Crushed Velvet put on a great show and the night turned out to be a huge success for everyone.

Looking forward to the upcoming weeks, Alcohol Awareness Week is October 19-25. There are many events planned to provide students with some knowledge about alcohol and alcohol consumption. These events include:

Sunday, October 19 - Ball Hockey Tournament. Students are required to enter a team and the money raised from the entrance will go to an alcohol related organization.

Monday, October 20, 11-2 - Kissing Booth. Students are required to answer alcohol related questions. For each correct answer they receive a Hershey's Kiss and for every wrong answer they get a sour candy.

Tuesday, October 21, 11-2 - Boat Races. Teams of four compete in a timed event which works as a relay team. When one person is finished drinking, the next member can begin.

Wednesday, October 22, 11-2 - Rub and Coke - Participants are treated to back rubs and Coca-Cola.

Thursday, October 23, 11-2 - Wall of Life. Students are given colored cue cards on which they are to share an experience or feeling about alcohol. The cards are posted by the students in a checkerboard style on the wall.

Friday, October 24 - Mike Mandel in the Pub Downunder.

Saturday, October 25, 3-9 - Grub Crawl. Students pay a nominal fee which entitles them to a variety of prizes. The students will be bussed to several different establishments for non-alcoholic drinks, appetizers, the main meal, dessert, and then entertainment.

Saturday, October 25 - Jon Southworth Band. Jon Southworth has appeared at COCA and is no stranger to the Sudbury community. He was featured at the Northern Lights Festival Boreal.

Monday to Friday

- Your Tuition in Beer. A display of the amount of alcohol which equals a student's tuition, books, and residence.

- Mocktails. There will be a mocktail featured every day with the week coming to a climax with a mocktails contest on Friday.

- Mock Spot Check/Breathalyzer. The local police will visit the campus and conduct a mock full spot check and simulate what would happen if students were ever pulled over for a spot check. Students will be asked to follow standard procedures for a roadside impairment test and give out fake citations to random passersby. The citations will be collected later and entered into a draw for a year membership to The Gym.

Concert Series #2 will be on Thursday, October 30 featuring **The Skydiggers**, **The Pursuit of Happiness** and **Snapper**. Tickets are \$8 in advance for SGA/AGE members, \$10 at the door and \$12 in advance and \$15 at the door for non-SGA/AGE. Doors will be open at 8:30pm. Tickets are available in the SGA/AGE office and the residence office.

Dear Dharma

Dear Dharma: My girl friend just got a cat for her birthday. It is a great pet to have, but she seems to be spending a little to much time with the cat and even less time with me. She always wants to be near the cat, or petting the cat, or making sure it's not bored. If she could just look my way once in a while, maybe she would notice that I am craving attention too. What can I do to win back the heart of my girlfriend from this feline intruder?

Kitten Crazy

Dear K.K.: There are a few steps you can take. First thing is you could accidentally loose the cat, but then you would get in trouble. The best thing to do is to bond with the cat. Put all you attention on the cat (well, to a certain level of decency at least!) Once the cat starts following you around, your girl friend will come tumbling after. The cat will love you, your girlfriend will crave the attention you give her cat and not her, and within weeks you will have both of them purring and eating out of the palm of your hand. Just make sure when you get the right one purring, the other is in another room somewhere playing with a piece of string or an elastic.

Dear Dharma: I loved what you said about the wrestling fan in last weeks issue. Do you think the same thing would work on any man addicted to a sporting event?

Benched

Dear Benched: Of course it would. Just don't drop kick a tennis fan. Just use your imagination. Set up a football game where touchdowns are scored very differently, make your man more interested in shifting your gears than watching a race, a five minute penalty could never be more exciting than it is in your special penalty box. And baseball fans, well the bat and balls are already handy, just run the bases and see just how many times you can score with your sports fan. But make sure you are not just fulfilling his fantasies. You probably have a few little secrets that you would like to share. So change out of that football uniform and make him do for you what you do for him, and pretty soon everyone will be yelling "Touchdown!"

Dear Dharma: The guys on my floor are planning to throw a great big party. We need a cool drinking theme to get people interested. The Century Club is getting old and we need some excitement! Of course you can come by, you seem like a party girl!

J. Daniels

Dear Jack: You know I do love a good party, and have outlasted some of the best alcoholics in UC over the past three years, but I have settled my ways (yeah, right!) I have a few games you could play, but remember, they are all strictly for pop and juice. You don't want to get drunk now do you? 1. Case Races. Get a case of you favorite, well, lets say pop. Either break off into teams or go on your own. The object is to finish off you case before anyone else. You can make it even more difficult by stipulating no peeing until you are done and just watch the people fall. 2. Second, you can go out and by all the different kinds of imports (watch out for that Japanese pop) and set up a world travel. You can even make different rooms or spots different countries and make the drinkers act like the people from that country. Sure it sounds strange now, but wait until you get to the Irish pop. Everyone will be singing the Lucky Charms song and falling over (from laughter of course). 3. Anything can be turned into a pop game. Twister, Monopoly, even Jeopardy. Just think of the possibilities!

Dear Dharma: How come every time I ride the bus to school I get really excited. I think it is due to the vibrations of the bus, or just being around all those people, but it turns me on and I can't help it. Do you know why?

Otto

Dear Otto: Yes, I do know the reason why this happens.....You are a freak! Thanks a lot. Now I can never ride public transportation again without thinking someone on the bus is getting off on the fact that the ride is a little bumpy. God, get some help, or at least take a cab!

If you have any questions about anything, drop them off to the Lambda office and they will be sure to get them to me. No subject is out of my league. I know everything, or at least people say that I think I do. Hope to hear from you soon!

Dharma

New In Video Stores

Liar Liar (Jim Carrey, Jennifer Tilly) Sure, this video has been out on the new release shelves for a while, but now you can own it! This has to be *Jim Carrey's* funniest performance to date. Jim plays a fast talking attorney who manipulates his life and every one in it by constantly lying. When his son makes a birthday wish that his dad can't lie for 24 hours, Jim's whole life goes straight to hell. As he tries to win an impossible case, keep his job, and stop his wife from moving to Boston with his son and her fiancée, his mouth becomes more and more of a hassle.

This movie will make you almost die laughing. Just seeing Jim tell the truth about sex, try to win a case without lying, and kick his own ass in a public washroom he has once again proven himself as an unbeatable talent in Hollywood. I hope there are more movies from Jim like this, and no more Ace's or Mask's. Just rent it, there is no way you could hate this movie.

Grosse Pointe Blank (John Cusack, Dan Aykroyd) This is a movie for everyone. Sure it looks like your typical love story with a twist. Well, it is, but it's an amazing twist. This movie is funny, sweet, and packs some amazing action sequences all into one flick. There is something for everyone, I swear!

The story follows a hit man (Cusack) who is in a career slump due to a battle with rival hit man Dan Aykroyd. When he receives a job in Detroit, he reluctantly also attends his high school reunion in Grosse Pointe. Cusack finds his old high school flame and starts to pursue her while rival hit men are trying to sabotage his job and have him killed. This movie is great! The story sounds a little weird, but trust me, it is so cool. A lot of action comedies usually have very cheesy action scenes, but this movie has the bang of a Schwarzenegger flick. The hit man thing has been done to death (see *Pulp Fiction*, *2 Days In The Valley*) but this movie puts a great swing on the life of a hit man. The movie also stars Minnie Driver and Jeremy Pivin.

Austin Powers. International Man Of Mystery (Mike Myers, Elizabeth Hurley) Making fun of James Bond, how could they. Well they did, and they made it hilarious. Mike Myers stars as Austin Powers, a high-fashion photographer who is actually undercover for British Intelligence. His enemy (also played by Myers), Dr. Evil (comic re-incarnation of Bond's Blofeld) is launched into space and Powers is cryogenetically frozen until Evil resurfaces. Of course in 1997, Evil returns and so does the completely out of style Powers who tries to save the planet and shag with his new partner.

You have to be a big Bond fan to understand a lot of the jokes, but it is funny nonetheless. Just let me warn you now. The scene in which Powers is trying to seduce Hurley on a rotating bed is funny, but it may also make you sick to your stomach! I don't think Myers has hit a gym for a long time. Just check the movie out, it will have you saying "Let's shag bay-bee!"

Breakdown (Kurt Russell, Kathleen Quinlan) Russell and Quinlan are driving through the American southwest when all of a sudden their jeep breaks down. A truck driver offers to give a ride to one of them to a nearby diner for a tow. Russell stays behind to try to fix the Jeep, and when he does, everything goes right down hill, and fast. His wife never showed up at the diner, the truck driver claims to have never seen them again, and there

a bunch of red-necks who are trying to capture him too. It's kind of like *The Vanishing* and *Deliverance* all mixed into one.

This movie starts off right away with its suspense and does not let up until the end. This is one of the best thrillers I have seen for a long time. There are no wasted scenes in which the audience becomes bored. Everything is nail-biting, and there are so many twists to the story, every time you think you know what is going to happen, things change. Nothing in this movie is beyond belief and it makes you think, it could happen to you.

Off The Shelves

by Mat Thompson
Entertainment Editor

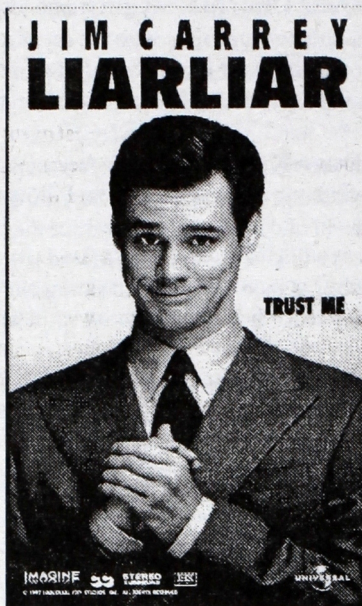

How many people out there had to read the epic poem *Beowulf* in highschool or university. I bet you thought that whatever teacher it was that made you read it was a sick, sadistic person and should be killed. Well, this edition of *Off The Shelves* is dedicated to those of you who agree with me and think *Beowulf* was one of the greatest stories ever created. Well, even if you just thought it was an interesting story, you may be interested in my selection for this week.

After I finished re-reading *Beowulf* for about the hundredth time, my grade 12 English teacher gave me a copy of the book *Grendel* by John Gardner. Of course this interested me since *Grendel* was the name of the fierce creature with whom *Beowulf* fights and destroys. But this book adds a little twist to the legend of *Beowulf* which turns your perception of what could have happened right around.

The story of *Grendel* covers the tragic life of *Grendel*, a creature with a very dysfunctional family (especially for the times) who through no fault of his own becomes tangled up in something he has no control over. He is cursed by a dragon, abused by his mother, and finally killed by an adrenaline charged, self-centered, murderer for hire. If you can't see the differences yet between the two novels you may have been drinking heavily during *Beowulf*.

This is a great book that takes a classic story and reverses it so that you feel for the original antagonist and think that the person who has been a hero for centuries is, to put it bluntly, an ass-hole! One good thing about the novel is that it is not written in old English like *Beowulf*, so your brain won't be fried after a few pages. I have read both stories many times now and still haven't decided who's side I am on. I never thought I could think anything of *Beowulf* other than that he was a hero, but now I just don't know.

The author John Gardner (not to be confused with the John Gardner who writes the new James Bond novels) is a former English teacher, writes beautifully making the reader forget what they have learned about the original story. Gardner died in a motorcycle accident in 1982, twenty-one years after this book was first published. Other works by Gardner include *The Art of Fiction*, *Jason and Medea*, *The Sunlight Dialogues*, and others. I strongly recommend this novel. In my opinion it is a classic and I recommend it as much as I possibly can. So if you are sick of all those sword wielding, people helping, heroes of old, pick up John Gardner's *Grendel*. It will give you a whole new out look on things.

STC Opens With A Scream

Sudbury Theatre Centre's first production of the season, *The Rise And Fall of Little Voice*, opened with a loud in-your-face holler. It was perfectly appropriate, considering the STC is practically hollering at Sudbury to awaken from its theatre apathy and take notice of some new and exciting changes they've initiated this year.

Anyone who has read any of my previous reviews of Sudbury Theatre Centre productions may remember that, although I hate to criticize any person or organization working to foster the arts in Sudbury (brave souls), I was certainly annoyed with the lack of professionalism exhibited by STC in the past. Awkward direction and forgotten lines, when combined with a hefty ticket price sorely shadowed the inspiration and creativity.

However, this year's season opener was absolutely incredible, and bodes well for the coming season. Jim Guedo, the new artistic director who replaced Gordon McCall in May, seems to have infused the organization with new life and energy. The STC has not only come up with some savvy new marketing, and upgraded the facility, but is displaying a new professionalism that makes their performance worth the ticket price. It would be almost impossible not to sit up and take notice of the new life with which the theatre is bursting. Perhaps even more importantly, especially to students, is the new emphasis STC is placing on accessibility. They have introduced a new pay-what-you-can Sunday matinee for those who normally would not be able to afford a \$20 evening.

Aside from the structural and institutional changes taking place, *The Rise and Fall of Little Voice* itself is quite exciting. Fantastically entertaining, it combines bawdy, licentious, low grade humor with the gentle, the beautiful and the sublime. The story centers around Little Voice (L.V.), a small whisper of a girl who lives with her loud, crass alcoholic mother. L.V. herself seems to find speech infinitely difficult and is painfully shy, but possesses the strange, wonderful talent of being able to sing in the voices of stars such as Judy Garland, Edith Piaf and Billie Holiday. Her mother and her mother's boyfriend seek to manipulate Little Voice, violating her and her fragility by making her perform at a club where they "take fresh talent and lay it at your mercy." At this point, all the garish humor of the play is turned into disgust, but the sad beauty of L.V. and her world also turn to hope as the pure and the true look to find their own voice.

The performance incited such a wide range of emotions in me that I'm not quite sure where to begin recommending it. The set consisted of layer upon layer of perfectly detailed kitsch. From the orange macramé plant holder to the shiny black jaguar statuette and the velvet palm tree painting, the set was a masterpiece of detailed tackiness.

The acting and directing were also quite flawless. Maralyn Ryan was perfect as Mari Hoff, L.V.'s mother. She projected an incredible energy and the fire of her character and life spread through the audience and quite literally through the play. Her comic timing provoked both disgust and a sort of strange awe. Colleen Tillotson was also perfect as the misty, ephemeral L.V. She was fragility personified, and the voices that sprung from her made me shiver. When she sang the lines from "Please don't talk about me when I'm gone" or "Somewhere over the Rainbow," I felt as though I was in the room with Billie Holiday or Judy Garland. It was definitely awe-inspiring, and perhaps a little creepy too.

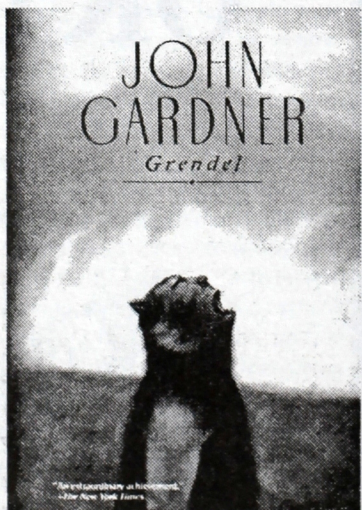

So, without any reservations, and with a loud scream perhaps, I can recommend attending the Sudbury Theatre Centre. *The Rise and Fall of Little Voice* only runs until October 9, but the next production *Wingfield's Folly*, runs until October 14 to 26.

Kraft Dinner Recipe of the Week

Noodle Pudding

Ingredients: 1 box Kraft Dinner
1 cup raisins
1/2 cup milk
1/2 tsp. nutmeg
1 tsp. butter
1/4 cup brown sugar
1 tsp. caraway seeds

Directions: Everyone has had some sort of a noodle pudding at their grandparents houses. Here is a way to make your own version of a classic. Cook KD and prepare according to the directions on the side of the box. In a separate bowl add together all the other ingredients listed above. Mix this mixture and the KD together and pour into a lightly greased loaf pan. Cover the pan with foil and bake for 20 minutes at 375 degrees. Serve hot or re-heat as a snack.

Death of a Rising Star

by Mat Thompson
Entertainment Editor

I have never been a big sports fan, but one of my favorite thing to watch ever since I was little has been professional wrestling. It's sad when a someone you have watched over the years finally dies.. In the past years many pro wrestlers have died including *Andre the Giant*, *Big John Studd*, *Texas Tornado*, *Dino Bravo*, and many others, but this last week, a superstar at the height of his career passed away in his sleep.

"**The Loose Cannon**" **Brian Pillman** died suddenly on October 4 in his hotel room after wrestling that night. There has been no official conformation about the cause of his early death, but it has been said that his heart was under tremendous stress and just gave out. Many people suspect it was steroids, but there was a lot about Pillman people did not know.

Brian Pillman was born with throat cancer and had to undergo dozens of operations when he was young. He was always told that he was too small to play any sports in school, so he worked out and started playing football. He was passed over in the *NFL* draft, but showed up to the *Cincinnati Bengals* training camp and was hired immediately. After a good football career he decided to go into professional wrestling and moved to Calgary to train with the legendary *Stu Hart* (father of *Bret* and *Owen*). With his training complete, he joined the ranks of

professional wrestling. Like everyone, he started out small and worked his way up the ranks through the *USWA*, the *WCW*, then on to the *WWF*.

Pillman was best known as **Flyin' Brian Pillman**, one half of the *Hollywood Blondes* (with *Steve Austin*), and worked hard to get to where he was today. Shortly after joining the *WWF*, Brian was in a head on collision with a drunk driver and was almost killed. He went through re-hab and had to have his ankle fused into one position so he could continue his professional career. Once in the ranks of the *WWF*, he joined the infamous *Hart Foundation* and instantly became a legend.

The rumors are flying about exactly what happened, but it is thought that he was taking too many pain killers and probably steroids for his injuries. With all the pain, stress, and medication Brian Pillman's heart finally gave up. It is sad because he finally got to the level in professional wrestling that he wanted to be at, and it was ended so abruptly. Brian leaves behind a wife and five children as a legacy to his life. No matter what you thought of **Brian Pillman**, you have to admit, he was great at what he did and will be missed by all!

BRIAN PILLMAN 1962 - 1997

Sex With Sue, LU Style!

by Mat Thompson
Entertainment Editor

It had to be the coolest night in the Pub. Friends, beer and sex talk. Sure, it sounds like every night in the pub, but instead of lying about sex to others, we were learning about things like the female orgasm and bum sex.

Wednesday, October 1 became "Sex Talk" day in the pub. Canada's own **Sue Johanson** from the "*Sunday Night Sex Show*" on the *Women's Network* came to the *LU Pub* to make sure that we were all aware of everything we needed to know about sex (and a few things we never thought of!) The event was sponsored by the *SGA* and was a great idea and success.

The wait to just get into the pub to see Sue was about 45 minutes to an hour, but well worth the wait! As we started to think up questions to ask her, Sue made a very informative and funny presentation to the crowd. She spoke of everything from masturbation (see, it's spelled right), to sexually transmitted diseases, to just plain relationship advice. I thought it would be weird going to the pub to her a lady talk to us about sex, but it was great. Sue is one of the best public speakers I have encountered and she makes learning and talking about a very sticky (no pun intended) subject easy and fun.

If you missed this show, hopefully there will be another at some time in the future. If you ever need to know something you are to embarrassed to ask a parent or friend about, call Sue on her radio or television show and you will get the straight facts. No topic is too strange for her (even how to avoid p***y farts). I am glad the *SGA* has brought something like this to the students of Laurentian. We may think we know everything, but from the questions we asked that night, we have a long way to go before we know even half of what Sue could teach us on the topic of sex!

POETRY CORNER

Tick, Talk

Tick-tock, tick-tock
The sound echoes from a broken clock
The ghosts of night are set to come in
Devoid of reason, cancerous with sin

The bell tolls the hour
The resurrection of the power
Catch tyranny by the tail
Their intentions seem so frail

They begin to surround me
Like daffodils to a tree
The scent of thousands drawn out one
While the giant steals the sun

My hand begins to move
So fluidly in their groove
Sweat beads upon my brow
Silence will hear me now

Tick talk, tick talk ...

Jes.

Eternity

No kiss is so sweet unless sent
down from heaven.
A soft sexy touch I will treasure
forever.

I look to the stars like the shine in
your eyes,
For a show of eternity with you in
my arms.

I'd put a ring on your finger of
angel's gold hair,
With the rarity and sheer beauty I
see in your face.

I'll show you rainbows on the
moon, and lightning in the sea,
I'll do anything for you if you stay
close to me.

J. Knight

Everybody Was Kung Foo Fighters!

The Foo Fighters and Sudbury. Did you ever think these two would ever collide. I sure as hell didn't! But on Monday October 13 the Foo Fighter along with Treble Charger rocked the roof off Big Thunder at Molson Canadian's Rocktoberfest.

If you weren't there then you missed out! Q92 gave away pairs of t-shirts to everyone for weeks before the event, and these shirts were the only way into Big Thunder. It was kind of funny seeing everyone lined in Downtown Sudbury all wearing the same damn shirt.

No one from Lambda was able to cover the event since none of us were able to win shirts and for some reason, Molson and Universal Concerts would not give us press passes to cover the event, so we just have to go by word of mouth. But if you missed this concert, there are always more (and sometimes better) bands playing at The Townhouse, for the *SGA* Concert Series, and other locations.

Entertainment Trivia #5

By correctly answering the following question, you can win the first ever Lambda Entertainment Surprise Bag. It's full of goodies, so enter quick!

Question: Name any band that is named after a character or saying from a Star Wars movie (This one's a little tricky!)

Answer: _____

Name: _____

Student Number: _____

Phone Number: _____

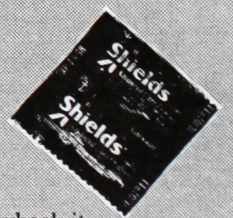

All entries must be received by Noon on Tuesday, October 21. Drop off completed entry forms to Lambda office above the Student Centre at SCE 301. Winner will be contacted by phone and printed in next issue.

Last weeks winner: Tim Taylor who answered Dr. No. Other possible answers were Goldfinger, Octopussy, and The Man With the Golden Gun.

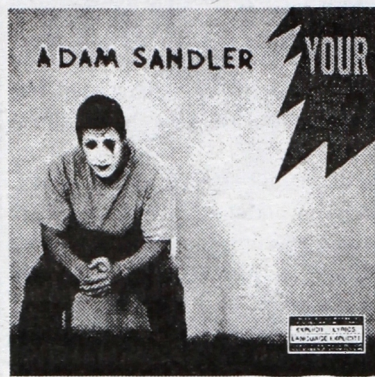

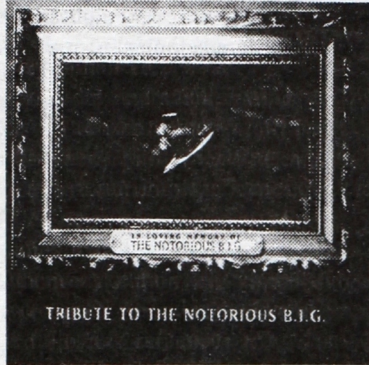

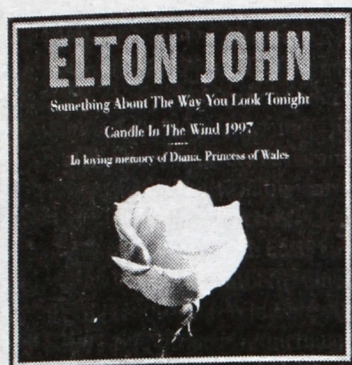

National Condom Week Slogans

They are always looking for a new slogan to the National Condom Week. Here are a few we came up with that might make people think a little harder about safe sex.

1. Cover your stump before you hump.
 2. A crank with armor will never harm her.
 3. Don't be silly, protect your willy.
 4. When in doubt, shroud your spout.
 5. Don't be a loner, cover your boner.
 6. You can't go wrong if you shield your dong.
 7. If she does not want to sack it, go home and whack it.
 8. If you think she's spunky, cover your monkey.
 9. If you slip between her thighs, be sure to condomize.
 10. It will be sweeter if you wrap your peter.
 11. She won't get sick if you wrap your dick.
 12. If you go in heat, package your meat.
 13. When un-dressing Venus, dress-up you penis.
 14. When you take off her pants and blouse, cover up your trouser mouse.
 15. If it's December, gift wrap your member.
 16. Don't be a fool, vulcanize your tool.
 17. The right selection will protect your erection.
 18. Wrap it in foil when checking her oil.
 19. Before you hump her, protect the pumper.
- If you haven't got the message by now.....No Glove, No Love!

LEND ME AN EAR

Puff Daddy - I'll Be Missing You & Elton John - Candle In The Wind 1997

by Mat Thompson
Entertainment Editor

First thing first. I am not trying to take away from the memory of these two people with this article, I am just stating my opinion on these tribute albums.

Recently, there have been many deaths of public figures. From **2-Pac**, **Notorious B.I.G.**, **Lady Diana**, **Mother Theresa**, **Burgess Merideth**, and just this past weekend, **John Denver**. Whenever this happens, the public jumps right on top of things and tributes are thrown at us left right and centre. It is great when these tributes can make money which can help others, but they seem lately to just take away from the life of the person we remember.

Elton John's rendition of *Candle in the Wind* for **Princess Diana** is a great tribute, but to those of us who are fans of **Marylin**, this new version does not sit well. The song was written for **Marylin**, and always will be. I know it is hard to come up with a song for a funeral which is days away, but taking an already amazing tribute song and changing it for someone else does not seem right.

One great thing about this album though is that all proceeds from its sales go to the **Diana, Princess of Wales, Memorial Fund** which will donate to the charities Diana helped out in he lifetime. And where does the money go from the **B.I.G.** tribute? From the looks of it, straight into the pocket of **Sean "Puffy" Combs**. What a way to make money. Rip off a classic song, add some of your own words, dedicate it to a dead friend and rake in the dough!

I'll Be Missing You in my eyes is just, yet again more proof that most Rap artists have no true writing talent. Almost every song that hits it big is a re-styling of an old classic. This tribute is a send up of the **Police** classic *Every Breath You Take*. It scares me how many old songs are redone and millions of people are saying "Did you hear that new song?" Hello! It's an old song redone to make money. Look how many groups have redone *Stayin' Alive* in the past 5 years. Well, enough with that. Back to the tributes.

Both albums contain 2 additional songs (**B.I.G.** contains four, but two are instrumentals of the others) which I guess are really there just to sell more albums by the groups involved. Tribute albums aren't that bad of an idea, but I can't recommend either of these since I still have a little spot in my heart for original music. It was a nice try by both of these artists to express how they feel about the loss of their friends, but it falls a little short of being worth the money of the listening public. Maybe they should be remembered for what they did in their lifetimes, not for what song was re-made when they died. **Norma Jean** will always by my *Candle in the Wind*.

Adam Sandler - What's Your Name

by Mat Thompson
Entertainment Editor

Well, it had to happen some time. **Adam Sandler** has gone from being a funny comedian to a **Weird Al** style musician. He does not take old songs and add new words (thank God), he just takes every style of music and creates some sort of weird song to go along with it. Don't get me wrong, Adam is a funny comedian, but with this album, his "I want to be a rock star" routine is getting a little old.

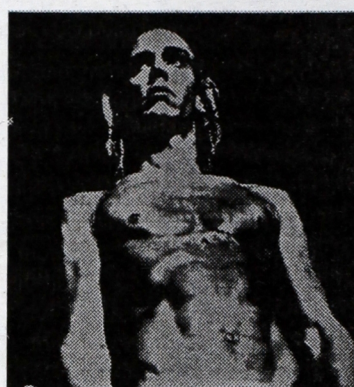

The first thing that has to be said right off the bat is that this album does contain *Red Hooded Sweatshirt*, which has become a fan favorite. The only problem is that it has been turned into a slow song and just is not as good as when it was first performed on *Saturday Night Live*.

The songs on this album range through every style with *Corduroy Blues*, *Zitty Van Zittles* (Country), *VooDoo* (Reggae), and any other style Adam could come up with. It is the songs that are written as pure comedy that are more entertaining. *The Goat Song* is hilarious in which Adam's talking goat sings of his days being tied to a pick up truck and beat by the old man. This is sure to be a listener favorite.

My favorite song on the album is *Listenin' to the Radio*. This song is about a guy who listens to all the slow songs on the radio and wonders why he never met a girl like the ones that everyone sings about. It's funny and sad at the same time hearing this guy

sing, "I want an Angie, a Mandy, a Candy-O / A devil in a dress of blue / A Rosanna, Diana, a Sweet Carolina / I'd even take a Runaround Sue."

For those of you who liked the comedy on the first two albums (*They're All Gonna Laugh At You* and *What The Hell Happened To Me?*) this is not the album you want to rush out and buy. The album is funny, but it is pure music, and Adam sings the whole time. So if *At A Medium Pace* wasn't your style, this may not be the album for you.

We Will Fall - The Iggy Pop Tribute

by Mat Thompson
Entertainment Editor

Now this is a tribute! **Iggy Pop** is not dead, but he sure as hell looks it sometimes. This new release from *Attic Records* collects together some of the greatest punk and rock acts in the business to pay tribute to the stick man himself. Yes, that's right. Mr. Anorexia **Iggy Pop**.

The album is packed with groups like **Sugar Ray**, **Misfits**, **Chilli Peppers**, **Joan Jett**, **Monster Magnet**, **7 Year Bitch**, and another king of punk **Joey Ramone**. There are 20 tracks to this album, and even though that seems like a lot, you will be craving more! With such classics as *1969*, *Real Wild Child*, *I Got A Right*, and *Loose* you will be transformed back to the early days of **Pop**. And of course, no tribute to **Iggy** is complete without his newest smash from *Trainspotting*, *Lust For Life* (performed by **NY Loose**).

This is what a tribute should be! A bunch of people getting together and playing the music that touched or inspired them. It's hard to think of **Iggy Pop** as inspiring, but hell, he has been around since Moses so he had to inspire someone other than **Weight Watchers**! Just get it because, *We Will Fall*!

Bob Dylan - Time Out Of Mind

by Alex Godbold
Contributor

Amidst the excitement, anticipation and speculation on the internet newsgroup rec.music.dylan, **Bob Dylan** fans, prior to his 41st release, were at least assured by one post to the newsgroup. The author of the post had come across the

following comment by Daniel Lanois, the producer of the new album entitled *Time Out Of Mind*: Dylan, according to Lanois, had re-defined the blues.

Now that the album is in circulation, this view will be definitely be confirmed by most fans. Like any good blues song, *Time Out Of Mind*, despite its dark or even bleak lyrical content, has a musical tone which is soothing in its effect.

The fact that Dylan's complete loss of faith in humanity is present throughout this album's lyrics is reason enough to describe them as dark. In *It's Not Dark Yet*, Dylan sings that his "Sense of humanity/has gone down the drain/ Behind every beautiful thing/ there is some kind of pain". What is it about these lyrics, though, which compels one to go even further and describe them as bleak are the two following reasons.

Firstly, Dylan has lost faith in intimate love as something which can heal wounds that have been inflicted by the outside world. This is exemplified in the track *Love Sick*. And secondly, some songs like *Tryin' to Get to Heaven* and *It's Not Dark Yet* present us with a **Bob Dylan** who feels separate from a divine source.

Dispite its extremely bleak lyrical content, it would be absolutely false to describe *Time Out Of Mind* as a depressing album. With the help of Lanois and of an impressive line of musicians, Dylan's re-definition of the blues is beyond description and lies somewhere between the lyrics and the beautiful music he and his mates have created.

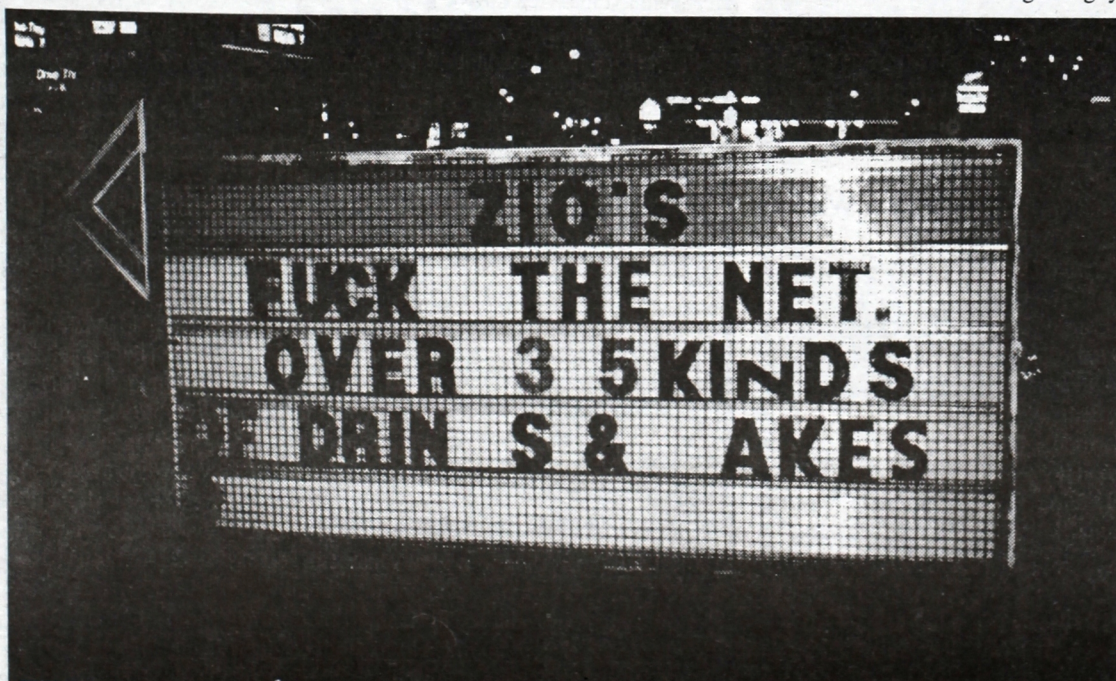

Forest For The Trees

by Mat Thompson
Entertainment Editor

Okay. I don't see the big deal surrounding this band. Every magazine I open, video I watch and person I talk to, the main band seems to be **Forest For the Trees**. If someone could explain it to me that would be cool!

"I'm the first person / You're the second person / Earlier today I was in the third person" The damn songs don't even make any sense (especially the popular first track *Dream*). There are 12 tracks and there is such a mix of styles floating around you have no idea who or what you are actually listening to! **Forest for the Trees** is just your typical dance group, mixing other band sounds in to try to make themselves different, but it just ends up becoming annoying.

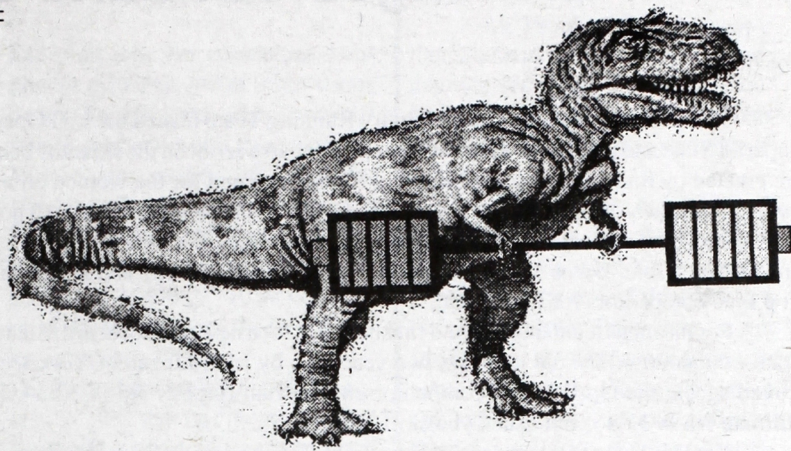

This is just a strange ass album and I will probably never listen to it again!

Yeah, I'll have a double mocha latté and maybe a little cyber sex on the side.

The Jurassic Gym

Jason Stevenson
Sports Editor

If you were to tour the facilities at the Athletic Centre you might be struck by the spacious and well decorated gymnasium. You might stand in awe at our Olympic size pool. You would think wow that's a nice pub for a phys-ed building.

After your little tour you would think that Laurentian has a quality athletic centre and you could, as long as you didn't go onto the weight room.

The weight room in the Athletic Centre is a "Jurassic Gym". Nearly if not all of the equipment is older than most of the student body. I will admit there seems to have been a recent acquisition of a universal machine. This is a machine that allows a person to do various exercises on different stations attached altogether. Well this is a great machine for the average student its just too bad that at least one station is always broken. The first week of school it was the bench press station and last week it was the pec-dec.

While writing this article I'm sitting in my chair and I trust that my chair won't fall out from under me. Well you don't have that kind of security when using some of the benches in the weight room. There is one bench that requires a bar to keep it upright, the bar is not secured to any part of the bench rather it sits like a brace against the back of the contraption.

Recently this defective bench caused an accident in which a student was doing incline presses on the smith machine when waaaaamm. The bench collapsed and the bar came like

a cartoon anvil down on his mid-section. Luckily the student was unharmed except for a nasty bruise across his stomach. I don't know about you but stories like this make me wary of using the facilities my tuition pays for.

If you have ever used the weight room you would know that we have a very interesting array of different dumbbells. When you can find the ones you want, you can pretty well trust that they're safe because a dumbbell wouldn't break, right. Well one did in our weight room last week. A student was doing dumbbell flies, (a exercise where you lie on a bench and brings your arms down and back up in a butterfly motion) when one of the dumbbells broke and the weighted portion broke off from the handle. Apparently when the dumbbell was welded it caused the metal to crystallize, thereby causing the apparent weakness in the metal. No matter how it happened it seems that Laurentian has avoided two possible lawsuits, because luckily in both incidents the student was not injured.

For a school that is appar-

ently proud of its athletics and tries to maintain its presence as an athletic power in the CIAU, it seems quite odd that they allow their athletes to train in such an environment. What if that bar had fallen on one of the guys on the basketball team or that dumbbell broke over the face of one of the soccer players. We know its possible because it's happened, bars have fallen and dumbbells have broke. So when is the University going to take notice that the athletes they prize shouldn't leave their minds as soon as they walk off the court, field or track. They should have their consideration while training to. That consideration should take the form of a safe and adequate training facility. Which our athletes, students and faculty, do not have.

If there is any question that our weight room is the "Jurassic Gym." Just go to any athletic centre in the CIAU and you will see the difference. You could even just take a trip to the other end of town to our college counterparts at Cambrian. When you first walked into their athletic centre you would see treadmills,

stairmasters and lifecycles. Things you don't see at Laurentian. Well there are those four monarch stationary bikes, I guess those could constitute as cardio equipment for some. Then in front of the treadmills, stairmasters and lifecycles is a television that students can watch as they sweat away their stress. I'll admit that as far as the weight room goes Cambrian's is just a little better than ours. But we are a University and they are a College, we pay more in tuition so that we have better facilities. Our weight room should not even compare to Cambrians. It

should be like comparing the Physical Education Program at Laurentian to the Fitness and Leisure Program at Cambrian, no comparison..

All the weight room needs are a few new benches, a new set of dumbbells and if generosity were not a problem maybe a few of the more modern cardio machines would be nice. Its not much to ask, its not much money compared to what the University must be spending on renovating Founders Square. The new Founders Square will add to the beauty of the University. New equipment in the weight room will add safety to the Athletic Centre. Which one do you think is more important? Of course the costs wouldn't even compare and maybe its time to look at where the money is going into the Athletic Centre. We can say for certain it's not the weight room.

So if you use the weight room complain to someone, anyone. Be careful and check everything before you use it because accidents not only might happen, they do in our weight room.

Howe's he do it?

Jason Stevenson
Sports Editor

On October 3rd a hockey legend made history for the umpteenth time. Hall of Famer Gordie Howe skated the first shift with the Detroit Vipers in their International Hockey League opener, becoming the only professional in his sport to compete in six decades.

As Howe skated out of the inflatable snake head and joined the team for the national anthem there was no question that these were the 1990's. The colors in Howe's jersey were red, aqua, gold and eggplant. He was presented with a bronze bust of his likeness and the ceremonial first puck was dropped by Howe's wife, Colleen.

Howe still looking fit and trim at 6-feet, 206 pounds never actually touched the puck during his 47 seconds of action. Although a shot by teammate Brad Shaw hit him on the leg and deflected toward Kansas City Blades goal tender Jon Casey, who incidentally made the save.

On another occasion, Howe bumped into Kansas City forward Ian Fraser. Howe said, "I was just thinking, Don't make a mistake."

After his historic shift Howe spent the rest of the first period and all

of the second seated in the middle of the Viper's bench. During a break in action a video message of congratulations from Wayne Gretzky played on the scoreboard. Taped tributes from several Detroit Pistons were also shown on the giant video screen.

The last time the Howe wore a minor league sweater was in the spring of 1946. That year he began a 25 year career with the Detroit Red Wings. After a brief retirement, he joined the Houston Aeros of the now-defunct World Hockey Association, playing with sons Marty and Mark. He finished his illustrious career back in 1980, after the league absorbed the Hartford Whalers.

Howe finished his NHL career in 1980 when he was 52. He played in all 80 games for Hartford that season, finishing with 15 goals and 26 assists. Throughout his career Howe scored 801 goals and had 1,049 assists in 1,767 NHL regular season games. He won the NHL's most valuable player award five times in an eight year span and led the Red Wings to four Stanley Cups.

In the end there is now doubt that this is one record that Wayne Gretzky won't be able to take from Howe.

From 3 Pointers to 3 Pitch...

On Saturday September 27th six teams participated in the annual Women's Intramural 3 Pitch Tournament. Perfect weather conditions helped to make the tournament a great success for all involved.

The winners of the tournament were a group of new comers to the intramural scene, Laurentian's very own Lady Vees Basketball/Baseball team (plus two). Though basketball is by far their strength it was nice to see the girls showing versatility. Second place went to the U of S Stokers "B" team, who also had the MVP of the tournament on their team. MVP went to a very loud and often humorous Louisa Marian-Bellemane. U of S Stokers "A", also showing fine form, took third place, as well as the most enthusiastic team award.

The most sportsman like award was presented to Jen Buell who displayed great sportsman ship throughout the entire tournament. The last award was the best dressed award and it was presented to Shelly Dewar of the basketball team, who showed her Canadian spirit proudly.

We hope to see everyone out next year and thank you to everyone who participated, especially thank you to our umpires and scorekeeper's. We would also like to thank our sponsors: Subway, Science North, Buzzy Brown's, Eddie's Restaurant, Coca Cola, Ralph's Sports Bar and Grill, EastSide Mario's, McDonal's, Dairy Queen, Notre Dame Bowl and Mariott.

Athletes Of The Week

Sept 28- Oct 3

Male Athlete

Peter Zorbas-Soccer

Peter Zorbas is a third year Science student at Laurentian University studying in the field of Bio-Medical Physics. A Native of Sudbury Ontario, Zorbas and his family have had extensive careers in Sudbury soccer.

As a third year mid-fielder for the Voyageurs, Zorbas had an outstanding game on Saturday when Laurentian University defeated University of Queen's. Zorbas stepped up his level of play on the field as one of his teammates was unable to play due to suspension. Not only did he dominate the midfield, Zorbas set up goal scoring opportunities and played exceptional defense and offense.

Female Athlete

Lynne Perron-Cross Country

Lynne Perron is a third year student in the School of Social Sciences at Laurentian University. Perron is studying in the field of Geography. Perron is a native of North Bay where she first got her running roots.

This past weekend the Cross Country Voyageurs competed in the Laurentian Open. Perron placed second out of eighteen runners in the 5.4 km run. This finish helped her team take first place honour over the Lake Superior State University team.

Hill Returns

Jason Stevenson
Sports Editor

Things are looking up for the Laurentian Hockey Vees. Star player and leading scorer from last year Kiley Hill has returned to the Vees lineup. Hill has returned from a tryout with the AHL's New Haven team. The Tampa Bay Lightning draft pick's aggressive play and scoring ability will surely help the Vees. Whose roster was left with a lot of holes to fill after last year.

The departure of players Corey Fletcher, Corey Evens, Jordan Scrutin and Kevin McKay have left a gaping hole in the Vees offensive and defensive play. Hill will hopefully take up where he left off last year leading the team along with captain Brad Braber. With a solid core of players returning the hockey Vees staring Hill and Braber should have a good cast of players supporting them.

VOYAGING

HOME

-This Friday and Sunday October 17th & 19th your Vees Men's Volleyball team will be hosting the Voyageur Invitational, come on out to the Ben Avery Gym and support the boys!!!

-Come out this Saturday or Sunday, October 18th or 19th and see your Soccer Vees take on the Yeoman of York or Trent University. These are the last regular season games for the Vees. Both games are at 1:00pm.

-Your Lady Vees Basketball team are playing in the Alumni game on Saturday October 18th at 6:00pm.

AWAY

-The Aqua Vees are heading to Brock, Friday October 17th and then to OUA relays at Guelph U. on Saturday.

-The Laurentian Hockey team is competing in the Ottawa Tournament Friday and Saturday October 17th & 18th.

Another Gold for Laurentian!

On Sunday, October 12, two members of the Laurentian University Karate Club traveled to Toronto to compete in the first Karate Ontario Grand Prix Tournament for the 1997-98 season. Karate Ontario is the governing body for Karate in Ontario and six Grand Prix Tournaments are used to determine who will be on the provincial team.

These tournaments are divided in two categories - *Kata* (forms) and *Kumite* (sparring). In *Kata*, competitors display a prearranged series of movements that are marked by five officials. The competitor who earns the highest combined score is declared the winner - it's a lot like gymnastics or figure skating. In *Kumite*, competitors face each other in combat and points are awarded when a fighter executes a controlled attack or counterattack that would have maimed or crippled their opponent. The first fighter to earn three points or the leader after three minutes of fighting is declared the winner.

In the Men's Intermediate (green-blue-brown belt) *Kata* division, Charles Fink outclassed a large number of opponents to earn a gold medal - his second in as many tournaments. In the Intermediate *Kumite* division, Charles lost a tight match (2.0 - 2.5) to the eventual champion.

Laurentian's presence was also felt in the Black Belt Divisions as Craig Vokey competed in both *Kata* and *Kumite*. Vokey Sensei is preparing to represent Canada and Laurentian at the Second Gojukai World Karate Championships in Brazil this November.

If you are interested in Karate and would like to learn more about it, please drop in and see us. We train Monday and Thursday evenings 5:30 to 7:00 in the Alphonse Raymond gym. Or, you can visit our Web Site at http://www3.sympatico.ca/cfink/lu_karate/. New members are always welcome.

The Laurentian University Karate Club

New Course Record Set as L.U edges out Lake State

John Thompson
Contributor

This past weekend the Cross Country Running Team hosted the L.U Open, where Laurentian took on Lake Superior State and the L.U Nordic Ski Team. The course is run on the ski trails behind the stadium where the runners are greeted by four major climbs over 9km for the men and for the women on major climb over 5.4km. Both the mens and womens teams finished ahead of Lake State. The women ran to a 15 point victory as Jenn Dewar lead the way, beating the nearest Lake State runner by two minutes in a time of 22:34. Lynne Perron (athlete of the week) 2nd in 23:34, Jenn Burns 3rd in 24:15, Erin Kennedy 4th in 24:31 and Darra Taylor 7th in 25:10 rounded out the Top Five competitors for Laurentian.

For the mens team Irah Gerono finished first, set a new course record to lead them to a close victory over Lake State. Irah eclipsed the old mark set two years ago by Mario Iozzo of York University by three seconds (31:29). Rounding out the top five L.U competitors were Brian English 3rd in 32:44, John Thompson 6th in 33:21, Pat Hillman 9th in 33:46, and Dan Cybulski 10th in 33:58.

Other L.U notables were Will Fitzgerald (L.U Nordic) 12th in 34:21 and Ken Sydney (Nordic Ski Coach) who beat Ben Stevenson to the finish line by one second. The Cross Country team will be travelling to London, this Friday for the Western Open to compete against the rest of Ontario. This will be the last race before the OUA Championships on Saturday October 25th in Windsor. Laurentian hopes to show the OUA that Laurentian is a Top Ten Team.

X-Country at Mustang Open

On Friday October 10, 1997 the men's and women's cross country running teams headed to London to compete in the Mustang Open at the University of Western Ontario.

The men's team finished a close second overall behind the home team, the Western Mustangs, which are ranked in the CIAU. Top finished for the men came from Brian English who placed sixth overall but was the fourth OUA runner across the line; Irah Gerono who finished twentieth overall and was the seventh OUA runner to cross the line; John Thompson who finished twenty second overall and was the eleventh OUA runner across the line; and Rob Vanden Hengle who finished twenty ninth overall and was the seventeenth OUA runner across the line.

The women's team finished fourth out of six teams at the meet. Top finishes for the women came from Jen Dewan who finished ninth, Lynne Perron who finished seventeenth, Jen Burns who finished twenty second, Erin Kennedy who finished twenty and Eding Mvilango who finished thirteenth.

Next Action for the cross country teams is October 25, when they travel to Windsor for the OUA finals.

Careers in Sports Marketing For all you SPAD students.

Since the 1980's, there has been an explosive growth in sports marketing. With that growth comes both a tremendous potential and new challenges.

Just why does sport have this attraction? What is the rationale for investing millions of dollars every year to associate a name with sport? The reasons are varied, but there are some which can be identified as the prime indicators which are common to all sponsorship advertising, large or small, national, regional or local.

Sponsorship advertising provides opportunities to:

- *Increase sales and market share for a product or service
- *Generate positive visibility for a product and corporate image
- *General favorable media interest in the community
- *Demonstrate good citizenship
- *Compete with other companies in an area other than the marketplace

Sports Times' focus is on the business of sports. Sport Times feels very strongly that the industry needs individuals who understand sound business principles. Sports marketing revolves around understanding consumer behavior and motivating target markets to purchase goods and services.

Sports promoters and marketers have noted the movement towards a closer relationship with amateur participants and their families, instead of just the sports event spectator. The grassroots are referred to repeatedly as the target market, which is another way of referring to all of us at the community level.

Guided by the belief that sports marketing is consumer driven, global in scope, and that entrepreneurial thinking and action are critical to the continued growth of the industry, Sport Times' is aiming to promote an environment where both the grassroots program and the corporate client come together for the common good of all parties within the sports and leisure industry.

Anyone interested in learning more about the Sports Marketing Industry, or about the career opportunities across Canada, with The Sports Times Corporation, can call (905)704-0228.

Road Apples & Other Fine Messes

by: Fat Louis & Wocheck
Contributors

Wocheck: Well Lou, here's another fine mess you've gotten us into.

Fat Louis: What'cha talkin about Wocheck?

Wocheck: First of all my time is precious. Ergo, I ask myself if I really have time to write this column week after week that you so gallantly have committed me to.

FL: Anyone who used the words "ergo" and "gallantly" in the same sentence should be committed.

W: Ha, Ha. Maybe I already am.

FL: Enough's enough, crazy man. While we wait for Nurse Ratched and your medication answer me this: what the hell should this column be about?

W: Sports, duh!

FL: Well, what kind of sports?

W: Only the greatest sport known to man. Its hot everything: grace speed, violence and most of all Canadian content.

FL: Ya I love Real Fishing and with Bob Izumi — he's my idol.

W: Listen here you Bass master... what we have here is failure to communicate — I'm talkin hockey!

FL: Oh Hockey, the savage ballet betwixt blood thirsty warriors..Lafontaine, Gretzky, Selanec.

W: Righto chap, no lets get down to business. Tell me who is going to win the Stan...

FL: The LEAFS!

W: I second that notion!

Mysterious Voice: At this time our long-suffering heroes are fondly having visions of glorious 67 and of the future.

W: Uh.. Lou Who the hell just interrupted my vision of the promised land?

FL: I don't know, and frankly, I don't think we want to know.

W: Paranormal activity aside, Lou would you please kindly tell our reader(s) why the Leafs are just so great?

FL: Easy one, they're not the Habs.

W: Heaven forbid!

FL: And now for something completely different. What other teams do you think might contend with our fabulous Maple Leafs this year?

W: Put your money on Colorado, Washington and my dark horse, the Mighty Ducks of Anaheim.

FL: The Ducks, the Ducks? You've got to be kidding. How can you overlook the Rangers, the Devils and my underdog, Ottawa.

W: Plain and simple Lou; the Rangers- to old; the Devils- too offer' sively challenged; Ottawa- too close to Montreal!

FL: Almost there Porkins, now tell me your MVP, scoring leader, best defenceman and top goalie for the year.

W: Hart-Kariya (hopefully he signs soon)

Art Ross-Jagr

Norris- Ozolinsh

Vezina-Roy

FL: Hart- Shanahan

Art Ross-Lindros

Norris-Bernard

Vezina-Brodeur

W: Well fellow Leaf faithful you might have noticed the suspicious absence of the Buds in our choices for the individual awards this year. The reason for this is ..uh...Lou?

FL: ...because our beloved Maple Leafs are finely-tuned machines. Each individual player is but a cog in the wheel of success.

W: Exactly, they'll just keep on truckin to Lord Stanley's Cup.

Mysterious Voice: Tune in next week when our erstwhile heroes...say something cool. (If they haven't been canceled, or perhaps lynched by irate Canadians fans.)

W: Ah Lou. I'm hearing that voice again.

FL: Be afraid, very afraid.

Soccer Vees Undefeated Weekend

by Alex McGregor
Soccer Specialist

Ah Thanksgiving at Laurentian. Students head home on Wednesday and return a week later. Your friendly neighborhood Soccer Vees headed to Peterborough and then to Ottawa..

Peterborough the home of Trent University and the Exalibur. Exalibur the sword of King Aurther. Fortunately the sword this year is a bit rusty and the Trent team is not strong. But in OU soccer action you never know. Our, doubts were put at rest within thirty seconds. Striker Gary (let me be) Tennant struck into the right corner. His goal was the winner. The Vees of late are on fire. WE kept pouring fuel on the flames.

Ricky (the pride of Hamilton) James smashed a annihilating header past the Trent goalie. 2 zip for the good guys. Trent showed spirit and a unnamed forward - smushed a weak shot, only to be foiled by Mark (the pride of Verna and Winston) Hamiton. Fortunately Chris (The pride of Mont Pearl) Rose was Newfie on the spot and sent the ball harmlessly over the bar.

Then Gary (the pride of Carly) Tennant pooped in a header. Three zip the good guys. More was to come - a seemingly harmless shot from Adrian Bubalo took a strange bounce and skipped past the Trent goalie. Four zips for the good guys.

When the world is in trouble we send for the Polish hussars. The Vees were not in trouble but we sent for Robert (the miracle on the Vistula) Fijal. Robert didn't disappoint coach Greg (Napoleon) Zorbas, or assistant coach Carlo Castrechino. The Polish white eagle went through the Trent defense like the Polish cavalry went the Bolsheviks not once but twice. Vantage six nothing.

Good performances from Lawrence (the pride of the Mahoney's) Mahoney, Damien (the pride of Big D) Puranda, Jeff (the pride of Benjica) Ormonde, Richard (the pride of the Corsairs) Corsi, Micheal (the pride of the world) Beites.

On to Snottowa to take on the mighty Ravens of Carleton U. The

raving Ravens you recall defeated your Vees in our opener. Revenge was on our minds and in our blood. A victory would ensure a playoff spot for us and the end of the season for the Raven. We had traveled millions of miles. The Ravens were at home and hadn't played on Saturday.

The Cartoon Ravens were ready for us. The game was live and in colour of Rogers Cable 22 Ottawa. Again Gary (the pride of Tennant Lager) almost put the game away early. His shot just missed. That set the tone of the game. Near misses at both ends. Then Steve (the pride of Manchester) Wilson took over. Big Steve was incredible. He took all the birds dropped on us and turned then aside. A goal before the interval by Gary (thats right) Tennant was all we needed and all she wrote. we almost

got another one from Michael (the pride of Calabria) Massimiliano. Then, Ricky (the pride of the universe) James put the ball in the net with his hand.

So it ended. Great game and sweat revenge. The Vees are playoff bound, the Cartoon Ravens are crow pie.

Corner Kicks: Great to see Dr. Brian (the pride of the United Church) Aithen with his mom at the Trent game. Our students and alumni were out in force at both games. the Vees are now coming together - great D, great offense and great Newfie screech in goal.

This Saturday and Sunday Open House. Hope to see you all out as we finish our regular season against the Yeothingys of York and the Excaliburs of Trent

Vees Volleyball

Vees place 7th overall at Brock Invitational

This weekend the Vees travelled to St. Catherine's to compete at the Brock Invitational. The team lost their first match against the University of Guelph 2-3, with scores of 17-16, 17-16, 13-15, 6-15 and 16-18. The Vees lost their second match to Niagara 1-3, with scores of 12-15, 15-8, 8-15 and 9-15. Top player for the Vees were veteran Alain Arseneau who had 22 attacks, 8 blocks and 4 digs against Guelph and 23 attacks, 5 digs and 3 aces against Niagara; rookie Benoit Fournier who had 28 attacks, 8 blocks and 3 digs against Guelph; and veteran Daniel Pilon with 5 attacks and 8 blocks.

On Saturday, October 3, 1997 the Vees met Laurier and lost 1-3 with scores of 12-15, 15-10, 14-6 and 4-15. Top players for the Vees were Alain Arseneau with 13 spikes, 7 blocks, 5 digs and 3 aces and rookie Serge Lesperance with 7 blocks and 5 digs.

The Vees final game was against Windsor. The Vees lost 0-3 with scores of 13-15, 4-15, 2-15. Top players of the match were Alain Arseneau with 6 kills and 4 digs, and Serge Lesperance with 4 kills and 6 blocks.

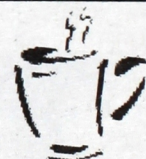

The Voyageurs finished with 4th in their pool and 7th overall out of a total of 8 teams.

Next action for the Voyageurs is October 17-19 when they travel to London to take part in the Mustang Invitational.

WHADA'YA MEAN "LOCS HAS BITE!"?

By James Bryers

Well for several weeks now you've been walking around the school asking yourself, "Whada'ya mean LOCS has BITE!" and now after much secrecy we are prepared to tell you. LOCS has BITE! is the new campaign this year put forth by Laurentian Off-Campus Students.

LOCS is trying to raise awareness of its organization, but it needs some help... from you! So LOCS is holding a contest. A contest to give the organization some identity. A contest to create a symbol that the students will recognize as LOCS. A contest, for a SPOKESDOG. That's right, a spokesdog. And we want you to design it!

This is how the contest works. You create the dog, you give him/her a name, you give him/her a slogan and you submit it to LOCS and you could be the big winner. You may ask yourself, and it is a valid

question, what the hell do I win?!? Its simple. If your dog is chosen, he becomes the new mascot for the organization. In exchange for giving us something with BITE, we'll be giving you a \$50 gift certificate to the LCBO so you can get something with BITE! This contest is open to all Laurentian students and the deadline for submissions is October 30th. Please see Rules and Regulations below or in the clubs room. The grand unveiling is on November 1st at Backstreet.

Coming up after the Turkey weekend, LOCS has your number for things to do before you're sent tumbling into the horror of exams. Keep your eyes peeled to the LOCS/EHCL Calendar in Lambda for info on our Hallowe'en Bash, Beer and Pizza Social, Semi-Formal Party and Retro 80's Lip-Synching Contest. We're always giving something away and having fun on Saturday nights at Backstreet, Sudbury's new number

one hot spot on Saturday nights.

The LOCS council still has a few positions open. If you'd like to help out and volunteer with Laurentian Off-Campus Students call 669-0841 or 670-9958 if you're interested.

LOCS has BITE! Contest Rules and Regulations

1. You must be a Laurentian student to enter.
2. You must be at least 19 years of age by January 1, 1998.
3. All entries must be at least 4" x 4" and on unlined paper. Entries should be in colour but are not required to be. Names should be unoffensive and short. Slogans should be unoffensive and printed neatly. Entries are not required to have a slogan. Laurentian Off-Campus Students reserve the right to change the name of the spokesdog.
4. All entries must be in good taste, and the spokesdog may NOT be pic-

tured with alcoholic beverages of any kind.

5. All entries must be submitted to the Laurentian Off-Campus Students mailbox by Thursday, October 30, 1997.

6. All entries, characters, names and slogans become property of Laurentian Off-Campus Students.

7. The prize for the winning entry will be awarded at the presentation of the spokesdog at Backstreet on November 1, 1997.

LOCS/EHCL Calendar

Fri. Oct. 17: LOCS On-Campus Pub @ Pub Downunder.

Sat. Oct. 18: Oktoberfest Celebration @ Backstreet. Prizes to be won.

Sat. Oct. 25: Hallowe'en Bash @ Backstreet. Prizes for best costumes.

Sat. Nov. 1: LOCS has BITE! Gala @ Backstreet. The unveiling and prizes.

Fri. Nov. 7: LOCS "&Pizza" Social. Location TBA.

Fri. Nov. 14: LOCS On-Campus Pub @ Pub Downunder.

Sat. Nov. 15: LOCS Retro 80's Lip-Synching Contest @ Backstreet. Prizes.

Sat. Nov. 22: LOCS Christmas Semi-Formal. Watch for Details.

**HAPPY
HOLIDAYS!**

Laurentian University student to take part in Commonwealth Youth Forum in Scotland

Neil McGraw, a Laurentian University student in his third year of studies in Political Science and Justice, and one of Laurentian's student Ambassadors is one of two delegates chosen to represent Canada at the 1997 Commonwealth Youth Forum. Held in Edinburgh, Scotland, from October 11 to 31, this Forum aims to attract the participation of every Commonwealth country.

October 1997 sees the United Kingdom hosting the next Commonwealth Heads of Government Meeting in Edinburgh.

This event will unite young people, aged 18 to 25 years, who are interested in international and Commonwealth issues. The Commonwealth Youth Forum is an opportunity for UK and overseas Commonwealth youth to share their vision and

concerns, and learn about UK society and their Commonwealth counterparts.

The Commonwealth Youth Forum will also provide an opportunity for young people to present their agenda and vision to the Commonwealth Heads of Government Meeting. This youth encounter aims to facilitate attitudes, skills, knowledge, and understanding for Commonwealth of the 21st century.

Neil McGraw has always had an interest in politics. As a high school student at Sudbury's Collège Notre-Dame, he took part in the Young Canadians Forum in Ottawa. Neil spent summer 1997 on Parliament Hill working as a tour guide in Canada's Parliament. For more information, please call Neil McGraw at (705) 560-6345.

ANNOUNCEMENTS

October 16: International Food Day

October 17: International Day for the Elimination of Poverty

In December 1992, the United Nations General Assembly has declared October 17th an International Day for the Elimination of Poverty. It is added to the existing International Food Day to fight malnutrition. October 16th also declared by United Nations as an international Food Day many years ago. Non-perishable donations can be deposited at the Reception of each Building + Library + Chaplains' Office L-228.

October 17: The LU Alumni Association and the Department of Interuniversity Athletics will host the **fourth annual LU Alumni Voyageur Hall of Fame Induction Diner** at the Idylwyld Golf and Country Club. Tickets, \$50 (includes a tax receipt), are available at the Alumni Affairs Office, ext. 4818 or John Metcalfe, 675-1160. Welcome to all.

October 18: Wendo, a women's beginners' self-defense course, will be offered on Saturday and Sunday, October 18 and 19. Location of course to be determined. Fee: \$60. Info: 673-1916.

October 18 & 19: Ms. Madeleine Dunoyer de Segonzac, an educator whose work with children is well-known in France and Europe, will conduct a two-day **workshop in French only** entitled "**Libération de la parole, libération du geste**" (**Freedom of Speech, Freedom of Movement**) for everyone interested in **communication problems in children**. (Voir surmonter les troubles de la communication pour plus de détail).

October 20-26: Spiritual and Religious Care Awareness Week sponsored by the Ontario Multifaith Council on Spiritual and Religious Care.

October 21: Toronto Dominion Bank's Career Reception in the Governor's Lounge, 11th floor, R.D. Parker Building, from 6 to 8 p.m. Complimentary refreshments and hors d'oeuvres will be available. This reception will allow you the opportunity to discuss career options with The Toronto Dominion Bank. There will be several area TD Bankers present together with other Management personnel from the Divisional Office in Toronto. Please confirm attendance by leaving your name with the Placement Centre 673-6598.

October 21: Sudbury Secondary School presents...International Championship Wrestling at 8:00 P.M. in GYM "A" at Sudbury Secondary School. It is a fund raising event for the athletic council for beneficial distribution throughout the school and the school community. Presenting are The Gothic Knight, The Shiek, Brook & Guts, Joe E. Legend, The Portuguese Warriors and other special guests. All tickets \$12.00 (in advance or at the door). For more information contact: Terry Moss at 674-7551 or International Championship Wrestling (519) 653-3837 or web site at <http://WWW.ICW.ON.CA>.

October 25: Laurentian University's 2nd Annual Open House - Learning Without Boundaries. Countless activities will be offered in various parts of the Laurentian campus. Info: Gisèle Pageau, ext. 3407.

ANNONCES

Surmonter les troubles de la communication

Les 18 et 19^e octobre et les 3 et 4 novembre prochains, Mme Madeleine Dunoyer de Segonzac, une éducatrice et pédagogue bien connue en France et en Europe pour son travail auprès des enfants, offrira un atelier à l'intention de tous ceux intéressés aux troubles de communication chez les enfants. Ces ateliers de formation, d'un durée de deux jours, sont parrainés par le programme de maîtrise en orthophonie de l'Université Laurentienne, s'intitulent "**Libération de la parole, libération du geste**". Ils seront offerts sur le campus de l'Université de 9h à 16 h. L'atelier du 18 et 19 octobre se déroulera dans la cafétéria du pavillon Alphonse-Raymond, alors que celui du 3 et 4 novembre aura lieu dans la salle L303 de l'édifice R.D. Parker.

HAPPY 20th BIRTHDAY ANGIE!!
From your friends:
Francine, Josée, Loraine,
Michèle, Rob & Joyce

Les étudiants universitaires et collégiaux inscrits en orthophonie, en éducation ou en garde éducative de l'enfance, les parents et grands-parents d'enfants qui ont des troubles de communication, les éducateurs ainsi que les professionnels de l'enfance sont invités à prendre part à ces journées de formation. Le coût d'inscription à un stage de formation est de 125\$ pour les étudiants; 150\$ pour les membres de l'APEDO (Association professionnelle pour l'enfance en difficulté de l'Ontario); et 180\$ pour

le grand public.

Mme Madeleine Dunoyer de Segonzac est une pédagogue et éducatrice par le jeu et par l'art. Durant l'atelier, cette experte française initiera les participants à des méthodes faciles à utiliser qui ont pour but de stimuler la parole et le langage chez des jeunes enfants et ceux accusant un retard de langage. Les participants apprendront à faire fructifier la dynamique naturelle de la parole chez les enfants en utilisant les trois moyens suivants: les mouvements des sons; la musique de la parole; et les traces en couleurs avec la peinture à doigts.

Pour vous inscrire, veuillez communiquer avec Mme Marine Blondeau, coordonnatrice du programme de maîtrise en orthophonie de l'Université Laurentienne, au (705) 675-1151, poste 3438.

SCHOLARSIPS/BOURSES

NSERC

Postgraduate Scholarships

A reminder to *all fourth year undergraduate and first, second and third year students* that application forms for **NSERC Postgraduate Scholarships** are now available at the School of Graduate Studies and Research L-808A.

The deadline for NSERC is **OCTOBER 30, 1997.**

ONLY students who have maintained an overall average of at least A-(80%), or the equivalent, during **each** of their **last two full years of study** at the postsecondary level may apply (extract taken from the brochure Ontario Graduate Scholarship Program).

Bourses d'études du CRSNG

Un rappel à *tous les étudiants de quatrième année et aux étudiants dans leur première, deuxième et troisième année aux cycles supérieures* que les formulaires de demande pour le **bourse d'études du CRSNG** sont maintenant disponibles à l'école des études supérieures et de la recherche L-808A.

La date limite pour les demandes du CRSNG est le **30 OCTOBRE 1997.**

SEULEMENT les étudiants ayant obtenu une moyenne d'au moins A-(80%), ou l'équivalent, au cours de **chacune** de leur **deux dernières années** d'études postsecondaires **complètes** peuvent faire demande (extrait tiré de la brochure intitulée 'Régime de bourses d'études supérieures de l'Ontario').
